Please excuse my long hand letter, I have no typewriter or do I own a computer.

There are several questions I need answers to.

How many Water Storage Tanks are in Pine and how many are in use?

How many water meter hook-ups are in Pine and how many are being used by part time residents?

Many residents of Pine are under the impression Pine Water Company ~~is~~ installing 25 water meters each months. What is the average hook-ups each month for the last 6 months?

I reside in Portal 3, Pine AZ. In 1989 Willamson Water Company interconnected this system into the E&R Water System. In these 14 years, millions of gallon of water has been pumped out of our well into this E&R system now knowns as Pine Water Company. Are there any plans in place to provide Portal 3 with water when our well goes dry. If Pine Water Company hauls water to our water tank, Will we be charged a hauling fee?

Over the Past 14 years, I have attended several Water meetings, some held by ACC and others held by our local Water Board. We are in the same status we were back in 1989, except we are paying much more to the Pine Water Company.

Thank you for any information you can furnish me.
