Dear Honorable

SW-04305A-05-0086
SW-04305A-05-0087

In reference to hearing held in Tucson June 29, 05, concerning the sewage system for the San Manuel Townsite. We feel that there was inadequate notification to the residents on this matter. Unfortunately we could not attend to voice our opposition to the exorbitant and greedy proposal that is being submitted by the pending new company which is in process of taking over.

Further it is our understanding that this is a facility that has no license to be turned over to this private company.

C.C.&N licensed facilities offer services at a prevailing rate of $12.- to $18.- in similar sized towns. Is there something underhanded here?

To grant such a request of between $42.- & $48.- as a monthly fee on the face of other rising utility costs would create further undue hardships on the citizens of this depressed community.

The closure of this mine and it's processing plant brought about many hardships to the unemployed people of our town. Many are still suffering with low paying jobs and many of us are now on retiree fixed incomes.

We feel that many of the operating expenses figured by this new company are highly exaggerated. With rumor of new development in the area that will bring more homes, we feel we will be forced to pay for those added facilities.

We therefore petition you to grant something that is within the prevailing range.

We further petition to have any future hearings to be held here in our town.

Sincerely,
Mr. & Mrs. Grant Solas Jr.
Petitioners
