Docket E-00000XX-13-0214

To Arizona Corporation Commission

0000157953

gy efficiency is very important not only for consumers but also for those ~~of~~ who have illness, like respiratory (such as COPD, ashma, and TB) to ~~[illegible]~~ excel in Arizona's dry heat. It'd also save money during the drastically hot desert climate in the summer (up to 116° or more!) on the typical consumer. As a resident of the state, I am in support of the current energy efficiency standard. I believe it should stay in effect to keep the benefits of energy efficiency.

I recognize that energy efficiency costs slightly more up front, but I agree to pay this cost to see my utility bills decrease over time. The current energy efficiency standard is key! Thank you for your work on this urgent issue.

Sincerely,

Faith N. Hunt
