Re: Duke Energy Maricopa, LLC 10 Year Plan

Pursuant to A.R.S. §40-360.02, Duke Energy Maricopa, LLC ("Duke") is filing this letter as its ten year plan regarding contemplated construction of transmission lines.

1. Size and Proposed Route:

Duke plans to construct a 525-kilovolt (kV) transmission line following a route approximately 2.4 miles long located in unincorporated Maricopa County near Arlington, Arizona, 50 miles west of Phoenix. The transmission line will originate at Duke's proposed combustion plant south of Elliott Road, approximately 0.7 miles west of 383rd Avenue (Wintersburg Road). The transmission line will terminate at a proposed substation located just south of Elliott Road, approximately 2.3 miles west of 355th Avenue. The transmission line will proceed from the proposed plant site north to Elliott Road and then turn east toward the proposed substation. For most of its length, the line will roughly parallel Elliott Road on the south side.

2. Purpose:

The purpose of the proposed 525 kV transmission line is to connect Duke's proposed combustion turbine plant to the proposed Palo Verde South substation.

3. Estimated Date of Operation:

The power plant's transmission line is expected to be operational in June, 2002.

This transmission line is described more fully in the Application for Certificate of Environmental Compatibility filed with the Utility Division Director on December 30, 1999.

Very truly yours,

LEWIS AND ROCA LLP

Thomas H. Campbell
