Re: Proposed Rate increase
Water: Bisbee 92-
W-01445A-02-0619

My wife and I have lived in Bisbee for about 10 yrs.
When we heard, belatedly, of 50% increase request by the water Co, it reminded us when we used to prepare budgets for approval by the Board of Supervisors (not in this area).

We were chastened several times for attempting to do what the H_2O Co. proposes for your approval.

The Board members unanimously, criticized us for laying before them a large spike in the budget flow. "Why weren't we appraised ahead of time? Why don't you go back and revise this proposal? Do research; get your main ~~item~~ ance items over a longer period of time. Don't wait til every thing wears out. It shows poor management skills!" We obviously, changed our approach.

This proposal in front of you seems to be of the same category. It will be a large burden on us retirees and poorer paid workers as most of us are here in Bisbee.

Thank you for your consideration
