DOCKETED BY

March 29, 2009

Dear Commissioners,

I am writing to you in order to support increased energy efficiency requirements be a part of the APS Rate Case. Please consider this measure seriously and make it a priority. We should maximize efficiency measures and require utilities to offer programs to assist customers to increase their energy efficiency.

Because these programs require funding, I am willing to pay higher rate to fund programs that will help me to lower my energy use and electric bills.

I would also like to see programs to help reduce the urban island effect through shading, cool roofs, and cool pavements. Please strongly consider financial incentives for homeowners & schools that increase energy efficiency as well as design assistance and incentives

for builders who construct efficient homes and buildings.

Thank you for considering my suggestions.

Sincerely,

Beverly Byrd
