AZ CORP COMMISSION
DOCKET CONTROL

Dear "Commissioners" July 23/09

We have APS asking for what?

About 6 or so months ago, APS wanted to raise rates and so you all allowed it.

About 3 or so months ago APS wanted to raise rates and so you all allowed it.

Now, APS wants to raise the Basic rates — so where is all this going? More profit for a Company that got rid of its workers and just has a "skeleton" crew and equipment? It takes days and weeks to repair storm or other electric lines so the people (customers) have the electric that they are paying for. Because the repair people have to be gathered from surrounding areas and communities.

Arizona Corporation Commission
DOCKETED

DOCKETED BY

It reminds us of a charge Co that received the payment in time but kept charging the person late charges they kept adding to the 1st late charge by month by month upon proof of the payment and them cashing the payment check they ignored this not stopping the late charges.

APS wants to do this — and they found the way — they need no raises in anything — greed

Check their profits for the last 6 months — maybe they want a Bail Out?

Stop this ripping off of the customers / consumers —

Their are no jobs — houses are lost, jobs are lost and McDonald can only employ so many "pattie cookers" — Wake Up!
