I'm a Mesa del resident and I feel that the proposed water Augmentation works more for Brookes (Payson Water Company) Then it does for the residents of Mesa del. It needs to be more in favor of the residents of Mesa del. We need a water Company that is willing to spend a little money so we will have a adequate water supply year round. Then the residents of Mesa del would not feel as bad when they have to pay more for water. As for the Stages 3, 4, and 5 I feel you should not have to worry about getting your water shut off until stage 5. If they go by your years previous bill to cut back on water after a year or two you will not be able to use any water at all. I understand having to cut back on water but they ask to much cutting back.

We should not have to worry about getting our meters turned off if we used about the same amount from the previous year. It also seems unlawful to be able to shut off someones meter. You can't cook, do dishes, take a shower, use the toilet, or give your animals water which is unhealthy. The re hook is to expensive most of us can't afford that. If we get sick because of having no water then Brookes should be held accountable for that. We just ask for a adequate water supply year round and not have to worry about our meter being turned off. ACC help work more in favor for the people of Mesa del Tnen for Brooks

Thank You

Mike Roeseke
