Re: Favoring decoupling and energy efficiency #G-01551A-10-0458

Dear Chairman Pearce and Commissioners,

I'm a forty-five year resident and voter in Arizona and a customer of Southwest Gas this whole time. I am writing in support of energy efficiency and decoupling in the Southwest Gas rate case.

I've put extra insulation in my home and installed ceiling fans throughout in an effort to be more energy efficient, but I'm afraid the result will be that the rates will go up, and I'll pay more for using less natural gas. Therefore I support revenue per customer decoupling.

As a ratepayer, I urge you to support both decoupling and energy conservation. Thank you for looking ahead for Arizona and helping create a successful climate for both utilities and consumers.

Sincerely,

Donna Brauch-Gilby
