Support for Energy Efficiency, specifically TEP Plan
E-01933A-11-0055

Dear Chairman Pierce and Commissioners;

Energy Efficiency is the #1 "program" to reduce our dependence on carbon-based fuels. Yet TEP had to cut its investment from $11M to $5M for 2012. As a ratepayer I'd rather these programs continue so others can take advantage of them. I already done much of this at my house.

We must reduce our dependence on carbon and increase our utilization of clean renewable and sustainable energy sources.

Please, support TEP's plan and maintain or improve the renewable standards and the efficiency plans of other utilities

Sincerely,
Michael Gordy
