Why 9.8%? That's seem quite high. Is Pinnacle West building another energy facility? How long will Arizonan's have to pay for this increase. I believe we are paying plenty in energy costs as it is especially when we have to endure power outages all summer long.

A rate increase is not justified at this time. With all the extra power we produce to sell to other states, why increase the ratepayers bills?
 Why aren't we developing solar power in Arizona? We have sunshine all the time.
 Why let businesses pay less than homeowners? They can afford higher rates better than those of us struggling to meet our bills in this poor economy?
 California is a great example of how deregulation doesn't work, lets not Californicate Arizona.
