Re: authority of APS to install smart meters and to charge money to people who opt out of Smart Meter

It is totally wrong for APS to have the authority to install smart meters and to fine people who opt out of smart meters.

This technology has not been tested for health effects upon sensitive people and people who have health problems. What about people like me who live on a limited income and have health issues. I live on $604 social security per month I cannot afford to be charged $30/month to opt out of smart meters. I moved to my home to be away from EMF and electronic devices as it makes me ill. I have a right to preserve my own health.

Please read article in the "Noise" April 2013 where it states that Pinnacle West (APS) financed Brenda Barton's campaign fund and re-election.

Title of article is APS smart meters and a Complicit corporation commission by Warren Woodward and Marie Cummings.

What about the health of Arizona Citizens who through no fault of their own are not wealthy or healthy. Why should they be charged money to opt out of smart meters which make them ill. This is wrong.

Do not allow APS to charge people to opt out of smart meters. People should be able to opt out of smart meters without receiving a fine from APS for protecting themselves against harmful microwaves.
