Dear Arizona Corporation 6/5/13

I am a T.E.P. customer in Tucson and I'm writing to inform you that I, among many other local customers, am supportive of T.E.P.'s energy efficiency programs and the energy efficiency standard adopted in 2010. In addition to increased renewable energy sources, the energy efficiency programs will be invaluable for meeting the 2020 standard we've set, especially fiscally.

I strongly believe that it is time for Arizona to see the big picture, in the long-term, regarding our need to upgrade and change our energy programs and business models. I am willing to invest in these crucial improvements in my electric bill to help all of us save money and energy now and continuing into the future. These programs really do make a difference for both residential and commercial customers.

Please reinstate T.E.P.'s energy efficiency programs without any more delay. Help Arizona meet these goals that many others have already begun. A stable system of funding and policy support for this is needed promptly.

Thank You
Catalina Ross
