Docket # E-01933A-12-0291

June 6, 2013

OPEN MEETING AGENDA ITEM

0000145388

Dear AZ Corp. Comm

The best thing about energy efficiency standards + the resulting savings is it is a gift that "Keeps on saving". I have benefited from a home energy audit from TEP. I learned of various actions and have followed through with taking steps because I care about my electric bill and I care about our environment and global climate change.

Please support expanding and fully funding energy efficiency in any decision on the TEP rate case.

I also planted trees on the South + West side of my house as recommended + provided by Trees for Tucson. The trees are already over my head in less than two years.

There is so much potential for clean solar energy in AZ. We have a great position on the globe because of our latitude + our 330 days of sun. NV has just approved a new grid + solar installation that will supply 400,000 homes with clean energy. That's what happens when the

consequences of Global Warming become close & personal. The effort to reduce CO_2 from human caused burning of fossil fuel takes on a new urgency!

ACC owes our state & the future generations of AZ citizens as much CLEAN ENERGY production as possible & that is much more than we have now. Energy Efficiency & Solar on Wind are the key ingredients to the future.

Sincerely,

Patty Stewart
