Doc #12-0271

Dear Chairman Stump and Commissioners,

I am writing to give my support to TEP'd decision to restart energy efficiency programs. Please support these programs and increase the energy efficiency budget. I am an Efficient and Resource customer.

The Commission should ensure a stable system of funding and policy to support efficiency. As a customer I am willing to support this thru my electric bill to decrease costs for all, reduce pollution, & support jobs.

I support home energy assessments, help with weatherization, Energy star lighting, appliance recycling, & shade tree program.

I feel the proposal to increase TEP's basic service charge by 40% for residential customers is excessive & penalizes all, including those of us who try to conserve.

I ask that Commissioners act to protect the interests of the present & future ratepayers by ensuring energy efficiency programs are fully funded and expanded as part of this rate case agreement to be approved by this Commission.

Sincerely,

Cathryn Johnson-Kilbahl
