RE: Docket # E-01933A 12-0291

Arizona Corporation Commission
DOCKETED
JUN - 6 2013

DOCKETED BY NR

Jane Stump
and Members of the Corporation Commission

I am writing you as a concerned ratepayer of T.E.P.'s service area. I urge you to heed the urgings of the ratepayers of Arizona

I strongly support the amazing and very forward thinking Energy Efficiency Standard for Arizona. The incentives of this program not only encourage us to reduce our future energy needs, - sensibly.

I have personally taken advantage of the home energy audit program, Trees for Tucson (Shade Trees program), appliance upgrading, energy metering in my home and others. These have saved me money and made me a proud contributor to a sensible and economically wise energy future. I have helped others benefit, too.

I know that you have been elected to also be sensible and wise arbiters of our energy rates. Energy efficiency helps us reduce our rates. You can do so much good for your communities and build a legacy of planning for a much more resilient + affordable energy future.

Please support full funding of all Energy Efficiency programs of our utilities!

Thank you very much

Barbara H Warren
