Dear Commissioners,
E-01933N
Re: Docket #: 12-02*91

I am writing to express my support of the energy efficient programs and also the energy efficient standard. I live in an older home in Tucson and also have an older rental house. I am a TEP customer and have begun to take advantage of improving my own energy efficiency. I have taken advantage of the Trees For Tucson and will continue to do so. I use Energy Star lighting + appliances and am in process of replacing my single pane windows with dual pane. Now that the efficiency plan has been reinstated, I want to do even more. I want to be involved in the home check-up program and address my weatherization needs. Installing solar panels is a real dream, particularly if the costs are manageable - as they could be with these energy efficiency programs. I have already saved money with the changes I have made, and am paying attention to the audits that are sent by TEP to monitor my bill. These measures are helpful to me as an individual - and as a small business owner - but also for my renters. These programs will also really benefit low income families - who particularly need the help. So I thank you for your work and encourage you to support, expand and fully fund energy efficiency programs. Sincerely,

[illegible]
