IN THE MATTER OF THE APPLICATION OF WATER UTILITY OF NORTHERN SCOTTSDALE, INC. FOR A RATE INCREASE

Docket Nos. W-03720A-12-0311

APPLICATION

EXHIBIT
A-7
ADMITTED

1. Water Utility of Northern Scottsdale ("WUNS or "Company") applies for a rate increase. A description of the proposed rate increase, an explanation of why it is necessary, and an explanation of the actions taken to limit the impact on customers (including low income customers) is included in the testimony that is being filed concurrently in the rate application of Global Water – Palo Verde Utilities Company.

2. In addition, a complete set of rate case schedules is included with this Application in accordance with A.A.C. R14-2-103.

3. A set of water use data sheets and plant descriptions for each Public Water System of the Company is included with this Application.

4. This application is being submitted at the same time as rate applications for six of the Company's sister utilities. In total, the following seven utilities are filing rate application: Global Water – Santa Cruz Water Company (Santa Cruz); Global Water – Palo Verde Utilities Company (Palo Verde), Valencia Water Company – Town Division, Valencia Water Company – Greater Buckeye Division (formerly Water Utility of Greater Buckeye), Water Utility of Greater Tonopah, Willow Valley Water Company, and Water Utility of Northern Scottsdale (collectively, the "Global Utilities", and together with their unregulated affiliates and parent companies, "Global

Water"). The Global Utilities are ultimately owned by Global Water Resources, Inc. The Company requests that the Commission consolidate these seven rate dockets.

Proposed Rate Increase

5. The Company seeks an increase to gross revenues of $2,844, or 2% over test year revenues. The increase in revenues from residential customers is 2%.

6. The requested increase is attributable to a number of factors. The Global Utilities have made significant investments in rate base since the 2008 test year used in their last rate case. The Global Utilities' expenses have also increased, including some expenses caused by federal government regulations, such as the EPA's Lead and Copper Rule, Disinfectants and Disinfection By-Products Rules and Groundwater Rule.

7. Certain decisions made by the Commission in Global Water's last rate case contribute to the requested increase. For example, while Commission Staff and Global agreed to a 10% return on equity (ROE) in that case, during the final day of the open meeting, the Commission reduced the ROE to 9.0%. That 9.0% ROE is far below the ROEs recently awarded to other water utilities in Arizona and other states, and is well below the Global Utilities' current cost of equity.

8. In addition, in Global Water's last rate case, the Commission treated all ICFA (Infrastructure Coordination and Financing Agreement) revenues as CIAC, ultimately causing an $85 million net loss for Global Water in 2010. Global Water believes the ICFA decision should be reversed for the reasons discussed during the Commission's 2011 water workshops. In particular, the Commission should recognize that ICFA funds should not be deducted from rate base when those funds are used to buy troubled utilities, as explained in the Direct Testimony of Paul Walker.

Ratepayer Protections

9. The Global Utilities have taken a number of steps to limit the impact of the rate increase on their customers. For the two largest Global Utilities (Santa Cruz and Palo Verde), the rate increase will be phased in, with the increase in any year limited to approximately 5% for the median residential user.

10. In addition, the Global Utilities will continue their Low Income Relief Tariff, and they propose that the tariff be extended to the Water Utility of Northern Scottsdale.

11. The Global Utilities have also taken steps to enable customers to limit the impact of the rate increase to their own bill. The Global Utilities propose continuing their unprecedented volumetric rebate program. Under this program, a customer that uses less than a specified amount will receive a rebate on their bill. As far as Global Water knows, this is the only rebate-based rate design in North America. Global Water also proposes continuing the current six-tiered rate design – the extra tiers as compared to a normal three-tiered design make it more likely that a lower tier can be achievable for any particular customer. In addition, Global Water now has web-based and smart-phone-app-based methods for customers to monitor and control their usage, increasing their ability to qualify for a lower rate tier or the volumetric rebate.

12. Lastly, the Global Utilities propose consolidating the rates of their West Valley Utilities: Water Utility of Greater Tonopah, Valencia Water Company – Town Division and Valencia Water Company – Greater Buckeye Division. This will protect the customers of Greater Tonopah from a large rate increase by spreading the increase over a much larger group of customers. The rate consolidation also recognizes that these utilities are all in the same region and are served by the same operations personnel working out of the same regional office.

Summary of Testimony

13. The Global Utilities are presenting the Direct Testimony of six witnesses. The Direct Testimony is included with Palo Verde's application, but is applicable to each of the 7 rate applications. A brief description of the testimony of each witness follows.

14. **Trevor Hill** is the President and CEO of Global Water Resources, Inc. and Global Water Management, Inc. He is also the President of each of the Global Utilities. Mr. Hill provides an overview of the rate application. He also comments on Global Water's 2009 rate case, and discusses the ongoing ICFA (Infrastructure Coordination and Financing Agreement) issue. Mr. Hill describes Total Water Management, Global Water's corporate philosophy of water supply management. Mr. Hill also describes improvements Global Water has made to customer service,

including the first water utility Smart Phone apps in the industry. Lastly, Mr. Hill describes the innovative FATHOM service provided by Global Water Management, Inc. to cities and water companies, enabling them to share in the efficiencies and innovations pioneered by Global Water.

15. **Ed Borromeo** is the Vice President, Operations for Global Water Management, Inc. His direct testimony provides further information about the customer service improvements made by Global Water, including improvements to Global's call center, its software, and increased hours of operation. Mr. Borromeo also provides further information regarding FATHOM, and provides both market and internal cost data to support the cost of the FATHOM services used by the Global Utilities. Mr. Borromeo demonstrates that the Global Utilities receive FATHOM services at less than the cost of those services, and that the cost is also less than the price of comparable services offered by other providers (although some services are unique to FATHOM).

16. **Ron Fleming** is the General Manager, Arizona for Global Water. In that role, he oversees each of the Global Utilities. He explains the woeful condition of several utilities purchased by Global Water using ICFA funds, and the improvements made by Global Water. He demonstrates why the purchases are in the public interest. Mr. Fleming provides data showing that the Global Utilities are efficient, reliable, and use less water per customer than the average utility. He also explains Global Water's proposed adjustment mechanisms for CAGRD fees and City of Maricopa license fees. Mr. Fleming provides detailed support for the Global Utilities' requests for post-test year plant, and for pro forma water treatment expenses for Willow Valley Water Co. Mr. Fleming also testifies in support of various tariff changes requested by the Global Utilities, including extension of the Low Income Relief Tariff to Water Utility of Northern Scottsdale. Mr. Fleming also describes the Global Utilities' test year water loss and the steps they are taking to reduce water loss. Lastly, Mr. Fleming describes the Global Utilities' proposed rate design.

17. **Brett Higginbotham** is the Controller for Global Water Resources, Inc. He explains Global's schedules and pro forma adjustments to rate base, revenues and expenses.

18. **Matt Rowell** explains the deferred tax asset created by the Commission's decision in Global Water's last rate case. Mr. Rowell also supports the Global Utilities' proposal to

consolidate the rates of Water Utility of Greater Tonopah, Valencia Water Company – Town Division and Valencia Water Company – Greater Buckeye Division. In a separate volume, Mr. Rowell provides expert testimony regarding the Global Utilities' cost of equity, cost of debt and required rate of return. Mr. Rowell proposes a cost of equity of 11.44%.

19. **Paul Walker** describes how ICFA funds were used to buy troubled water companies, and why those funds should not be deducted from rate base. He explains the ratemaking issues associated with using developer funds to pay for troubled water companies, including Global Water's alternative request for an acquisition adjustment. Mr. Walker demonstrates the financial and rate impacts of the Commission's decision regarding ICFAs in Global Water's last rate case, and he puts forward a proposal for dealing with future ICFA funds. Lastly, Mr. Walker proposes a Distribution System Improvement Charge (DSIC) for Global's water utilities and a Collection System Improvement Charge (CSIC) for Global's wastewater utility, Palo Verde.

Contact Information

20. The Global Utilities' attorneys are:

Roshka DeWulf & Patten, PLC
One Arizona Center
400 East Van Buren Street, Suite 800
Phoenix, Arizona 85004

Compliance Information

21. The Global Utilities are currently in compliance with all requirements of the Commission, the Arizona Department of Environmental Quality (ADEQ) and the Arizona Department of Water Resources (ADWR).

WHEREFORE, the Company respectfully requests that the Commission:

A. Consolidate this case with the Rate Applications of the other 6 Global Utilities;

B. Schedule a hearing on this Application as soon as possible; and thereafter

C. Issue a final order:

1. Granting the rate increase requested herein;
2. Approving the CAGRD and City of Maricopa license fee adjustment mechanisms requested herein;
3. Approving the new and revised tariffs proposed in the Direct Testimony of Ron Fleming;
4. Approving the Distribution System Improvement Charge (DSIC) and Collection System Improvement Charge (CSIC) proposed in the Direct Testimony of Paul Walker;
5. Consolidating the rates of Water Utility of Greater Tonopah, Valencia Water Company – Town Division and Valencia Water Company – Greater Buckeye Division; and
6. Granting such other and further relief as may be appropriate under the circumstances herein.

RESPECTFULLY SUBMITTED this 9th day of July 2012.

ROSHKA DEWULF & PATTEN, PLC

Significant Accounting Policies — The Company prepares its financial statements in accordance with accounting principles generally accepted in the United States of America. Significant accounting policies are as follows:

Utility Plant — Property, plant and equipment is stated at cost less accumulated depreciation provided on a straight-line basis.

Depreciation rates for asset classes of utility property, plant and equipment are established by the Commission. The cost of additions, including betterments and replacements of units of utility fixed assets are charged to utility property, plant and equipment. When units of utility property are replaced, renewed or retired, their cost plus removal or disposal costs, less salvage proceeds, is charged to accumulated depreciation.

In addition to material costs, direct labor and personnel costs, and indirect construction overhead costs may be capitalized

Revenue Recognition — Water services revenues are recorded when service is rendered or water is delivered to customers. However, in addition to the monthly basic service charge, the determination and billing of water sales to individual customers is based on the reading of their meters, which occurs on a systematic basis throughout the month. At the end of each reporting period, amounts of water delivered to customers since the date of the last meter reading are estimated and the corresponding accrued, but unbilled revenue is recorded.

Water connection fees are the fees associated with the application process to set up a customer to receive utility service on an existing water meter. These fees are approved by the ACC through the regulatory process and are set based on the costs incurred to establish services including the application process, billing setup, initial meter reading and service transfer. Because the amounts charged for water connection fees are set by our regulator and not negotiated in conjunction with the pricing of ongoing water service, the connection fees represent the culmination of a separate earnings process and are recognized when the service is provided.

Meter installation fees are the fees charged to the developer or builder associated with the installation of a new water meter. Fees charged for meters installed within a service area regulated by the ACC are refundable pursuant to a utility line extension agreement and properly recorded as a liability. For a portion of our service area, meter installation fees are not refundable. Because these fees are negotiated with the developer or builder independent of service that will be provided to the end-user and represent the culmination of a separate earnings process, they are recognized when the service is rendered. Accordingly, revenue for water meter sales is recognized at the time the water meters are installed.

Wastewater service revenues are generally recognized when service is rendered. Wastewater services are billed at a fixed monthly amount per connection, and recycled water services are billed monthly based on volumetric fees.

Advances and Contributions in Aid of Construction — The Company has various agreements with Developers and builders, whereby funds, water line extensions, or wastewater line extensions are provided to us by the Developers and are considered refundable advances for construction. These advances in aid of construction ("AIAC") are noninterest bearing and are subject to refund to the Developers through annual payments that are computed as a percentage of the total annual gross revenue earned from customers connected to utility services constructed under the agreement over a specified period. Upon the expiration of the agreements, the remaining balance of the advance becomes nonrefundable and at that time is considered CIAC. Contributions in aid of construction are amortized as a reduction of depreciation expense over the estimated remaining life of the related utility plant.

DOCKETED BY

IN THE MATTER OF THE APPLICATION OF GLOBAL WATER – SANTA CRUZ WATER COMPANY FOR THE ESTABLISHMENT OF JUST AND REASONABLE RATES AND CHARGES FOR UTILITY SERVICE DESIGNED TO REALIZE A REASONABLE RATE OF RETURN ON THE FAIR VALUE OF ITS PROPERTY THROUGHOUT THE STATE OF ARIZONA.	Docket No. W-20446A-12-0314
IN THE MATTER OF THE APPLICATION OF WILLOW VALLEY WATER COMPANY FOR THE ESTABLISHMENT OF JUST AND REASONABLE RATES AND CHARGES FOR UTILITY SERVICE DESIGNED TO REALIZE A REASONABLE RATE OF RETURN ON THE FAIR VALUE OF ITS PROPERTY THROUGHOUT THE STATE OF ARIZONA.	Docket No. W-01732A-12-0315 **NOTICE OF FILING COMPLETE SET OF REVISED AND UPDATED SCHEDULES OF GLOBAL UTILITIES**

On July 9, 2012, Valencia Water Company – Town Division ("Town Division"), Global Water – Palo Verde Utilities Company ("Palo Verde"), Water Utility of Northern Scottsdale ("WUNS"), Water Utility of Greater Tonopah ("WUGT"), Valencia Water Company – Greater Buckeye ("Valencia-Greater Buckeye"), Global Water – Santa Cruz Water Company ("Santa Cruz") and Willow Valley Water Company ("Willow Valley"), (collectively, the "Global Utilities") filed rate applications. The rate cases have been consolidated. After the original rate applications the Global Utilities have filed various revisions and updates to their rate schedules. At the request of Commission Staff, the Global Utilities have prepared a set of schedules that include all of the revisions to date. Accordingly, the Global Utilities file the attached set of all schedules including all updates.

RESPECTFULLY SUBMITTED this 21st day of December 2012.

Significant Accounting Policies — The Company prepares its financial statements in accordance with accounting principles generally accepted in the United States of America. Significant accounting policies are as follows:

Utility Plant — Property, plant and equipment is stated at cost less accumulated depreciation provided on a straight-line basis.

Depreciation rates for asset classes of utility property, plant and equipment are established by the Commission. The cost of additions, including betterments and replacements of units of utility fixed assets are charged to utility property, plant and equipment. When units of utility property are replaced, renewed or retired, their cost plus removal or disposal costs, less salvage proceeds, is charged to accumulated depreciation.

In addition to material costs, direct labor and personnel costs, and indirect construction overhead costs may be capitalized. Interest incurred during the construction period is also capitalized as a component of the cost of the constructed assets, which represents the cost of debt associated with construction activity. Expenditures for maintenance and repairs are charged to expense.

Revenue Recognition — Water services revenues are recorded when service is rendered or water is delivered to customers. However, in addition to the monthly basic service charge, the determination and billing of water sales to individual customers is based on the reading of their meters, which occurs on a systematic basis throughout the month. At the end of each reporting period, amounts of water delivered to customers since the date of the last meter reading are estimated and the corresponding accrued, but unbilled revenue is recorded.

Water connection fees are the fees associated with the application process to set up a customer to receive utility service on an existing water meter. These fees are approved by the ACC through the regulatory process and are set based on the costs incurred to establish services including the application process, billing setup, initial meter reading and service transfer. Because the amounts charged for water connection fees are set by our regulator and not negotiated in conjunction with the pricing of ongoing water service, the connection fees represent the culmination of a separate earnings process and are recognized when the service is provided.

Meter installation fees are the fees charged to the developer or builder associated with the installation of a new water meter. Fees charged for meters installed within a service area regulated by the ACC are refundable pursuant to a utility line extension agreement and properly recorded as a liability. For a portion of our service area, meter installation fees are not refundable. Because these fees are negotiated with the developer or builder independent of service that will be provided to the end-user and represent the culmination of a separate earnings process, they are recognized when the service is rendered. Accordingly, revenue for water meter sales is recognized at the time the water meters are installed.

Wastewater service revenues are generally recognized when service is rendered. Wastewater services are billed at a fixed monthly amount per connection, and recycled water services are billed monthly based on volumetric fees.

Advances and Contributions in Aid of Construction — The Company has various agreements with Developers and builders, whereby funds, water line extensions, or wastewater line extensions are provided to us by the Developers and are considered refundable advances for construction. These advances in aid of construction ("AIAC") are noninterest bearing and are subject to refund to the Developers through annual payments that are computed as a percentage of the total annual gross revenue earned from customers connected to utility services constructed under the agreement over a specified period. Upon the expiration of the agreements, the remaining balance of the advance becomes nonrefundable and at that time is considered CIAC. Contributions in aid of construction are amortized as a reduction of depreciation expense over the estimated remaining life of the related utility plant.

4					
5	Current Rate of Return (Line 3 / Line 1)			5.10%	5.10%
6					
7	Required Operating Income (Line 9 * Line 1)			$ 5,300,691	$ 5,300,691
8					
9	Required Rate of Return			8.81%	8.81%
10					
11	Operating Income Deficiency (Line 7 - Line 3)			$ 2,234,624	$ 2,234,624
12					
13	Gross Revenue Conversion Factor			1.639005	1.639005
14					
15	Increase in Gross Revenue Requirements			$ 3,662,560	$ 3,662,560
16					
17					
18	Customer	Present	Proposed	Dollar	Percent
19	Classification	Rates	Rates	Increase	Increase
20					
21	Residential	$ 9,762,983	$ 14,692,684	$ 4,929,701	50.5%
22	Commercial	440,865	660,964	220,099	49.9%
23	Non-Potable	305,271	1,071,097	765,826	250.9%
24					
25	Total of Water Revenues	$ 10,509,118	$ 16,424,745	$ 5,915,626	56.3%
26					
27	Miscellaneous Revenues	345,001	345,001	-	0.0%
28					
29	Total Operating Revenues	$ 10,854,119	$ 16,769,746	$ 5,915,626	54.5%
30					
31	Total Adjusted Revenues (Schedule C-1)	$ 13,107,528	$ 16,769,746	$ 3,662,218 *	27.9%
32					
33					

34 NOTE: The revenue amounts on lines 21, 22, 23, 25, and 29 above do not reflect the final step of the rate phase in ordered in
35 Palo Verde's last rate case. That is why the increase amounts on lines 21, 22, 23, 25, and 29 is significantly larger than the
36 Increase in Gross Revenue Requirements on lines 15 and 31.
37
38 *The increse shown on line 31 does not match exactly with that shown on line 15 because an effort was made to keep
39 the rates to round numbers.

Significant Accounting Policies — The Company prepares its financial statements in accordance with accounting principles generally accepted in the United States of America. Significant accounting policies are as follows:

Utility Plant — Property, plant and equipment is stated at cost less accumulated depreciation provided on a straight-line basis.

Depreciation rates for asset classes of utility property, plant and equipment are established by the Commission. The cost of additions, including betterments and replacements of units of utility fixed assets are charged to utility property, plant and equipment. When units of utility property are replaced, renewed or retired, their cost plus removal or disposal costs, less salvage proceeds, is charged to accumulated depreciation.

In addition to material costs, direct labor and personnel costs, and indirect construction overhead costs may be capitalized. Interest incurred during the construction period is also capitalized as a component of the cost of the constructed assets, which represents the cost of debt associated with construction activity. Expenditures for maintenance and repairs are charged to expense.

Revenue Recognition — Water services revenues are recorded when service is rendered or water is delivered to customers. However, in addition to the monthly basic service charge, the determination and billing of water sales to individual customers is based on the reading of their meters, which occurs on a systematic basis throughout the month. At the end of each reporting period, amounts of water delivered to customers since the date of the last meter reading are estimated and the corresponding accrued, but unbilled revenue is recorded.

Water connection fees are the fees associated with the application process to set up a customer to receive utility service on an existing water meter. These fees are approved by the ACC through the regulatory process and are set based on the costs incurred to establish services including the application process, billing setup, initial meter reading and service transfer. Because the amounts charged for water connection fees are set by our regulator and not negotiated in conjunction with the pricing of ongoing water service, the connection fees represent the culmination of a separate earnings process and are recognized when the service is provided.

Meter installation fees are the fees charged to the developer or builder associated with the installation of a new water meter. Fees charged for meters installed within a service area regulated by the ACC are refundable pursuant to a utility line extension agreement and properly recorded as a liability. For a portion of our service area, meter installation fees are not refundable. Because these fees are negotiated with the developer or builder independent of service that will be provided to the end-user and represent the culmination of a separate earnings process, they are recognized when the service is rendered. Accordingly, revenue for water meter sales is recognized at the time the water meters are installed.

Wastewater service revenues are generally recognized when service is rendered. Wastewater services are billed at a fixed monthly amount per connection, and recycled water services are billed monthly based on volumetric fees.

Advances and Contributions in Aid of Construction — The Company has various agreements with Developers and builders, whereby funds, water line extensions, or wastewater line extensions are provided to us by the Developers and are considered refundable advances for construction. These advances in aid of construction ("AIAC") are noninterest bearing and are subject to refund to the Developers through annual payments that are computed as a percentage of the total annual gross revenue earned from customers connected to utility services constructed under the agreement over a specified period. Upon the expiration of the agreements, the remaining balance of the advance becomes nonrefundable and at that time is considered CIAC. Contributions in aid of construction are amortized as a reduction of depreciation expense over the estimated remaining life of the related utility plant.

Significant Accounting Policies — The Company prepares its financial statements in accordance with accounting principles generally accepted in the United States of America. Significant accounting policies are as follows:

Utility Plant — Property, plant and equipment is stated at cost less accumulated depreciation provided on a straight-line basis.

Depreciation rates for asset classes of utility property, plant and equipment are established by the Commission. The cost of additions, including betterments and replacements of units of utility fixed assets are charged to utility property, plant and equipment. When units of utility property are replaced, renewed or retired, their cost plus removal or disposal costs, less salvage proceeds, is charged to accumulated depreciation.

In addition to material costs, direct labor and personnel costs, and indirect construction overhead costs may be capitalized. Interest incurred during the construction period is also capitalized as a component of the cost of the constructed assets, which represents the cost of debt associated with construction activity. Expenditures for maintenance and repairs are charged to expense.

Revenue Recognition — Water services revenues are recorded when service is rendered or water is delivered to customers. However, in addition to the monthly basic service charge, the determination and billing of water sales to individual customers is based on the reading of their meters, which occurs on a systematic basis throughout the month. At the end of each reporting period, amounts of water delivered to customers since the date of the last meter reading are estimated and the corresponding accrued, but unbilled revenue is recorded.

Water connection fees are the fees associated with the application process to set up a customer to receive utility service on an existing water meter. These fees are approved by the ACC through the regulatory process and are set based on the costs incurred to establish services including the application process, billing setup, initial meter reading and service transfer. Because the amounts charged for water connection fees are set by our regulator and not negotiated in conjunction with the pricing of ongoing water service, the connection fees represent the culmination of a separate earnings process and are recognized when the service is provided.

Meter installation fees are the fees charged to the developer or builder associated with the installation of a new water meter. Fees charged for meters installed within a service area regulated by the ACC are refundable pursuant to a utility line extension agreement and properly recorded as a liability. For a portion of our service area, meter installation fees are not refundable. Because these fees are negotiated with the developer or builder independent of service that will be provided to the end-user and represent the culmination of a separate earnings process, they are recognized when the service is rendered. Accordingly, revenue for water meter sales is recognized at the time the water meters are installed.

Wastewater service revenues are generally recognized when service is rendered. Wastewater services are billed at a fixed monthly amount per connection, and recycled water services are billed monthly based on volumetric fees.

Advances and Contributions in Aid of Construction — The Company has various agreements with Developers and builders, whereby funds, water line extensions, or wastewater line extensions are provided to us by the Developers and are considered refundable advances for construction. These advances in aid of construction ("AIAC") are noninterest bearing and are subject to refund to the Developers through annual payments that are computed as a percentage of the total annual gross revenue earned from customers connected to utility services constructed under the agreement over a specified period. Upon the expiration of the agreements, the remaining balance of the advance becomes nonrefundable and at that time is considered CIAC. Contributions in aid of construction are amortized as a reduction of depreciation expense over the estimated remaining life of the related utility plant.

Median Consumption: 15,500

Note:
The monthly minimum for this meter size is $120. Two of the bills had monthly minimum amounts of $16.00 and $36.00 to reflect a partial months billing. As a result, the amount of revenue calculated by the bill count for the monthly minimum must be reduced by $188.00:

	Actual	Mo. Min	Difference
Bill 1	$ 16.00	$ 120.00	$ (104.00)
Bill 2	36.00	120.00	(84.00)
	Adjustment to match bill count revenue		$ (188.00)

Significant Accounting Policies — The Company prepares its financial statements in accordance with accounting principles generally accepted in the United States of America. Significant accounting policies are as follows:

Utility Plant — Property, plant and equipment is stated at cost less accumulated depreciation provided on a straight-line basis.

Depreciation rates for asset classes of utility property, plant and equipment are established by the Commission. The cost of additions, including betterments and replacements of units of utility fixed assets are charged to utility property, plant and equipment. When units of utility property are replaced, renewed or retired, their cost plus removal or disposal costs, less salvage proceeds, is charged to accumulated depreciation.

In addition to material costs, direct labor and personnel costs, and indirect construction overhead costs may be capitalized. Interest incurred during the construction period is also capitalized as a component of the cost of the constructed assets, which represents the cost of debt associated with construction activity. Expenditures for maintenance and repairs are charged to expense.

Revenue Recognition — Water services revenues are recorded when service is rendered or water is delivered to customers. However, in addition to the monthly basic service charge, the determination and billing of water sales to individual customers is based on the reading of their meters, which occurs on a systematic basis throughout the month. At the end of each reporting period, amounts of water delivered to customers since the date of the last meter reading are estimated and the corresponding accrued, but unbilled revenue is recorded.

Water connection fees are the fees associated with the application process to set up a customer to receive utility service on an existing water meter. These fees are approved by the ACC through the regulatory process and are set based on the costs incurred to establish services including the application process, billing setup, initial meter reading and service transfer. Because the amounts charged for water connection fees are set by our regulator and not negotiated in conjunction with the pricing of ongoing water service, the connection fees represent the culmination of a separate earnings process and are recognized when the service is provided.

Meter installation fees are the fees charged to the developer or builder associated with the installation of a new water meter. Fees charged for meters installed within a service area regulated by the ACC are refundable pursuant to a utility line extension agreement and properly recorded as a liability. For a portion of our service area, meter installation fees are not refundable. Because these fees are negotiated with the developer or builder independent of service that will be provided to the end-user and represent the culmination of a separate earnings process, they are recognized when the service is rendered. Accordingly, revenue for water meter sales is recognized at the time the water meters are installed.

Wastewater service revenues are generally recognized when service is rendered. Wastewater services are billed at a fixed monthly amount per connection, and recycled water services are billed monthly based on volumetric fees.

Advances and Contributions in Aid of Construction — The Company has various agreements with Developers and builders, whereby funds, water line extensions, or wastewater line extensions are provided to us by the Developers and are considered refundable advances for construction. These advances in aid of construction ("AIAC") are noninterest bearing and are subject to refund to the Developers through annual payments that are computed as a percentage of the total annual gross revenue earned from customers connected to utility services constructed under the agreement over a specified period. Upon the expiration of the agreements, the remaining balance of the advance becomes nonrefundable and at that time is considered CIAC. Contributions in aid of construction are amortized as a reduction of depreciation expense over the estimated remaining life of the related utility plant.

Significant Accounting Policies — The Company prepares its financial statements in accordance with accounting principles generally accepted in the United States of America. Significant accounting policies are as follows:

Utility Plant — Property, plant and equipment is stated at cost less accumulated depreciation provided on a straight-line basis.

Depreciation rates for asset classes of utility property, plant and equipment are established by the Commission. The cost of additions, including betterments and replacements of units of utility fixed assets are charged to utility property, plant and equipment. When units of utility property are replaced, renewed or retired, their cost plus removal or disposal costs, less salvage proceeds, is charged to accumulated depreciation.

In addition to material costs, direct labor and personnel costs, and indirect construction overhead costs may be capitalized. Interest incurred during the construction period is also capitalized as a component of the cost of the constructed assets, which represents the cost of debt associated with construction activity. Expenditures for maintenance and repairs are charged to expense.

Revenue Recognition — Water services revenues are recorded when service is rendered or water is delivered to customers. However, in addition to the monthly basic service charge, the determination and billing of water sales to individual customers is based on the reading of their meters, which occurs on a systematic basis throughout the month. At the end of each reporting period, amounts of water delivered to customers since the date of the last meter reading are estimated and the corresponding accrued, but unbilled revenue is recorded.

Water connection fees are the fees associated with the application process to set up a customer to receive utility service on an existing water meter. These fees are approved by the ACC through the regulatory process and are set based on the costs incurred to establish services including the application process, billing setup, initial meter reading and service transfer. Because the amounts charged for water connection fees are set by our regulator and not negotiated in conjunction with the pricing of ongoing water service, the connection fees represent the culmination of a separate earnings process and are recognized when the service is provided.

Meter installation fees are the fees charged to the developer or builder associated with the installation of a new water meter. Fees charged for meters installed within a service area regulated by the ACC are refundable pursuant to a utility line extension agreement and properly recorded as a liability. For a portion of our service area, meter installation fees are not refundable. Because these fees are negotiated with the developer or builder independent of service that will be provided to the end-user and represent the culmination of a separate earnings process, they are recognized when the service is rendered. Accordingly, revenue for water meter sales is recognized at the time the water meters are installed.

Wastewater service revenues are generally recognized when service is rendered. Wastewater services are billed at a fixed monthly amount per connection, and recycled water services are billed monthly based on volumetric fees.

Advances and Contributions in Aid of Construction — The Company has various agreements with Developers and builders, whereby funds, water line extensions, or wastewater line extensions are provided to us by the Developers and are considered refundable advances for construction. These advances in aid of construction ("AIAC") are noninterest bearing and are subject to refund to the Developers through annual payments that are computed as a percentage of the total annual gross revenue earned from customers connected to utility services constructed under the agreement over a specified period. Upon the expiration of the agreements, the remaining balance of the advance becomes nonrefundable and at that time is considered CIAC. Contributions in aid of construction are amortized as a reduction of depreciation expense over the estimated remaining life of the related utility plant.

Significant Accounting Policies — The Company prepares its financial statements in accordance with accounting principles generally accepted in the United States of America. Significant accounting policies are as follows:

Utility Plant — Property, plant and equipment is stated at cost less accumulated depreciation provided on a straight-line basis.

Depreciation rates for asset classes of utility property, plant and equipment are established by the Commission. The cost of additions, including betterments and replacements of units of utility fixed assets are charged to utility property, plant and equipment. When units of utility property are replaced, renewed or retired, their cost plus removal or disposal costs, less salvage proceeds, is charged to accumulated depreciation.

In addition to material costs, direct labor and personnel costs, and indirect construction overhead costs may be capitalized. Interest incurred during the construction period is also capitalized as a component of the cost of the constructed assets, which represents the cost of debt associated with construction activity. Expenditures for maintenance and repairs are charged to expense.

Revenue Recognition — Water services revenues are recorded when service is rendered or water is delivered to customers. However, in addition to the monthly basic service charge, the determination and billing of water sales to individual customers is based on the reading of their meters, which occurs on a systematic basis throughout the month. At the end of each reporting period, amounts of water delivered to customers since the date of the last meter reading are estimated and the corresponding accrued, but unbilled revenue is recorded.

Water connection fees are the fees associated with the application process to set up a customer to receive utility service on an existing water meter. These fees are approved by the ACC through the regulatory process and are set based on the costs incurred to establish services including the application process, billing setup, initial meter reading and service transfer. Because the amounts charged for water connection fees are set by our regulator and not negotiated in conjunction with the pricing of ongoing water service, the connection fees represent the culmination of a separate earnings process and are recognized when the service is provided.

Meter installation fees are the fees charged to the developer or builder associated with the installation of a new water meter. Fees charged for meters installed within a service area regulated by the ACC are refundable pursuant to a utility line extension agreement and properly recorded as a liability. For a portion of our service area, meter installation fees are not refundable. Because these fees are negotiated with the developer or builder independent of service that will be provided to the end-user and represent the culmination of a separate earnings process, they are recognized when the service is rendered. Accordingly, revenue for water meter sales is recognized at the time the water meters are installed.

Wastewater service revenues are generally recognized when service is rendered. Wastewater services are billed at a fixed monthly amount per connection, and recycled water services are billed monthly based on volumetric fees.

Advances and Contributions in Aid of Construction — The Company has various agreements with Developers and builders, whereby funds, water line extensions, or wastewater line extensions are provided to us by the Developers and are considered refundable advances for construction. These advances in aid of construction ("AIAC") are noninterest bearing and are subject to refund to the Developers through annual payments that are computed as a percentage of the total annual gross revenue earned from customers connected to utility services constructed under the agreement over a specified period. Upon the expiration of the agreements, the remaining balance of the advance becomes nonrefundable and at that time is considered CIAC. Contributions in aid of construction are amortized as a reduction of depreciation expense over the estimated remaining life of the related utility plant.

Significant Accounting Policies — The Company prepares its financial statements in accordance with accounting principles generally accepted in the United States of America. Significant accounting policies are as follows:

Utility Plant — Property, plant and equipment is stated at cost less accumulated depreciation provided on a straight-line basis.

Depreciation rates for asset classes of utility property, plant and equipment are established by the Commission. The cost of additions, including betterments and replacements of units of utility fixed assets are charged to utility property, plant and equipment. When units of utility property are replaced, renewed or retired, their cost plus removal or disposal costs, less salvage proceeds, is charged to accumulated depreciation.

In addition to material costs, direct labor and personnel costs, and indirect construction overhead costs may be capitalized. Interest incurred during the construction period is also capitalized as a component of the cost of the constructed assets, which represents the cost of debt associated with construction activity. Expenditures for maintenance and repairs are charged to expense.

Revenue Recognition — Water services revenues are recorded when service is rendered or water is delivered to customers. However, in addition to the monthly basic service charge, the determination and billing of water sales to individual customers is based on the reading of their meters, which occurs on a systematic basis throughout the month. At the end of each reporting period, amounts of water delivered to customers since the date of the last meter reading are estimated and the corresponding accrued, but unbilled revenue is recorded.

Water connection fees are the fees associated with the application process to set up a customer to receive utility service on an existing water meter. These fees are approved by the ACC through the regulatory process and are set based on the costs incurred to establish services including the application process, billing setup, initial meter reading and service transfer. Because the amounts charged for water connection fees are set by our regulator and not negotiated in conjunction with the pricing of ongoing water service, the connection fees represent the culmination of a separate earnings process and are recognized when the service is provided.

Meter installation fees are the fees charged to the developer or builder associated with the installation of a new water meter. Fees charged for meters installed within a service area regulated by the ACC are refundable pursuant to a utility line extension agreement and properly recorded as a liability. For a portion of our service area, meter installation fees are not refundable. Because these fees are negotiated with the developer or builder independent of service that will be provided to the end-user and represent the culmination of a separate earnings process, they are recognized when the service is rendered. Accordingly, revenue for water meter sales is recognized at the time the water meters are installed.

Wastewater service revenues are generally recognized when service is rendered. Wastewater services are billed at a fixed monthly amount per connection, and recycled water services are billed monthly based on volumetric fees.

Advances and Contributions in Aid of Construction — The Company has various agreements with Developers and builders, whereby funds, water line extensions, or wastewater line extensions are provided to us by the Developers and are considered refundable advances for construction. These advances in aid of construction ("AIAC") are noninterest bearing and are subject to refund to the Developers through annual payments that are computed as a percentage of the total annual gross revenue earned from customers connected to utility services constructed under the agreement over a specified period. Upon the expiration of the agreements, the remaining balance of the advance becomes nonrefundable and at that time is considered CIAC. Contributions in aid of construction are amortized as a reduction of depreciation expense over the estimated remaining life of the related utility plant.

Willow Valley Water Company, Inc.
Test Year Ended December 31, 2011
Changes in Representative Rate Schedules

Monthly Minimum Charges:

Meter Size (All Classes*)	Basic Service Charge Present	Basic Service Charge Proposed	Basic Service Charge Change
5/8" by 3/4" Meter	$ 21.12	$ 35.00	$ 13.88
3/4" Meter	21.12	35.00	13.88
1" Meter	52.80	87.50	34.70
1.5" Meter	105.60	175.00	69.40
2" Meter	168.96	280.00	111.04
3" Meter	337.92	560.00	222.08
4" Meter	528.00	875.00	347.00
6" Meter	1,056.00	1,750.00	694.00
8" Meter	2,112.00	3,500.00	1,388.00

Commodity Rate Charges:

Potable Water - All Meter Sizes and Classes	Rate Block Present	Rate Block Proposed	Volumetric Charges (Per 1,000 Gallons) Present	Volumetric Charges (Per 1,000 Gallons) Proposed	Volumetric Charges (Per 1,000 Gallons) Change
Tier One Breakover	1,000 gallons	1,000 gallons	$ 1.48	$ 5.00	$ 3.52
Tier Two Breakover	5,000 gallons	5,000 gallons	2.99	6.25	3.26
Tier Three Breakover	10,000 gallons	10,000 gallons	4.51	7.75	3.24
Tier Four Breakover	18,000 gallons	18,000 gallons	6.00	9.25	3.25
Tier Five Breakover	25,000 gallons	25,000 gallons	7.50	10.75	3.25
Tier Six Breakover	999,999,999	> 25,000 gallons	9.00	12.00	3.00
Conservation Rebate Threshold ("CRT") in Gallons	6,401	5,000			
Commodity rate rebate applied if consumption is below the CRT:	45%	50%			

*Includes all potable water meters including irrigation meters.

Non-Potable Water - All Meter Sizes and Classes	Present	Proposed	Change
All Gallons (Per Acre Foot)	185.74	651.70	465.96
All Gallons (Per 1,000 Gallons)	0.57	2.00	1.43

Miscellaneous Service Charges	Present	Proposed	Change
Establishment of Service	$ 35.00	$ 35.00	$ -
Establishment of Service (After Hours)	50.00	50.00	-
Re-establishment of Service (Within 12 Months)	(a)	(a)	
Reconnection of Service (Delinquent)	35.00	35.00	-
Meter Move at Customer Request	(b)	(b)	
After Hours Service Charge, Per Hour*	50.00	50.00	-
Deposit	(c)	(c)	
Meter Re-Read (If Correct)	30.00	30.00	-
Meter Test Fee (If Correct)	30.00	30.00	-
NSF Check	30.00	30.00	-
Late Payment Charge (Per Month)	1.50%	1.5%	
Deferred Payment Charge (Per Month)	1.50%	1.50%	

(a) Number of Months off System times the monthly minimum per A.A.C. R14-2-403(D).
(b) Cost to include parts, labor, overhead and all applicable taxes per A.A.C. R14-2-405(B)(5).
(c) Per A.A.C. R14-2-403(B).
* For After Hours Service Calls for work performed on the customer's property; not to be charged in addition to an establishment or a reconnection after hours charge.
In addition to the collection of its regular rates and charges, the Company shall collect from customers their proportionate share of any privilege, sales or use tax in accordance with A.A.C. R14-2-409(D)(5).

Significant Accounting Policies — The Company prepares its financial statements in accordance with accounting principles generally accepted in the United States of America. Significant accounting policies are as follows:

Utility Plant — Property, plant and equipment is stated at cost less accumulated depreciation provided on a straight-line basis.

Depreciation rates for asset classes of utility property, plant and equipment are established by the Commission. The cost of additions, including betterments and replacements of units of utility fixed assets are charged to utility property, plant and equipment. When units of utility property are replaced, renewed or retired, their cost plus removal or disposal costs, less salvage proceeds, is charged to accumulated depreciation.

In addition to material costs, direct labor and personnel costs, and indirect construction overhead costs may be capitalized. Interest incurred during the construction period is also capitalized as a component of the cost of the constructed assets, which represents the cost of debt associated with construction activity. Expenditures for maintenance and repairs are charged to expense.

Revenue Recognition — Water services revenues are recorded when service is rendered or water is delivered to customers. However, in addition to the monthly basic service charge, the determination and billing of water sales to individual customers is based on the reading of their meters, which occurs on a systematic basis throughout the month. At the end of each reporting period, amounts of water delivered to customers since the date of the last meter reading are estimated and the corresponding accrued, but unbilled revenue is recorded.

Water connection fees are the fees associated with the application process to set up a customer to receive utility service on an existing water meter. These fees are approved by the ACC through the regulatory process and are set based on the costs incurred to establish services including the application process, billing setup, initial meter reading and service transfer. Because the amounts charged for water connection fees are set by our regulator and not negotiated in conjunction with the pricing of ongoing water service, the connection fees represent the culmination of a separate earnings process and are recognized when the service is provided.

Meter installation fees are the fees charged to the developer or builder associated with the installation of a new water meter. Fees charged for meters installed within a service area regulated by the ACC are refundable pursuant to a utility line extension agreement and properly recorded as a liability. For a portion of our service area, meter installation fees are not refundable. Because these fees are negotiated with the developer or builder independent of service that will be provided to the end-user and represent the culmination of a separate earnings process, they are recognized when the service is rendered. Accordingly, revenue for water meter sales is recognized at the time the water meters are installed.

Wastewater service revenues are generally recognized when service is rendered. Wastewater services are billed at a fixed monthly amount per connection, and recycled water services are billed monthly based on volumetric fees.

Advances and Contributions in Aid of Construction — The Company has various agreements with Developers and builders, whereby funds, water line extensions, or wastewater line extensions are provided to us by the Developers and are considered refundable advances for construction. These advances in aid of construction ("AIAC") are noninterest bearing and are subject to refund to the Developers through annual payments that are computed as a percentage of the total annual gross revenue earned from customers connected to utility services constructed under the agreement over a specified period. Upon the expiration of the agreements, the remaining balance of the advance becomes nonrefundable and at that time is considered CIAC. Contributions in aid of construction are amortized as a reduction of depreciation expense over the estimated remaining life of the related utility plant.

SANDRA D. KENNEDY
PAUL NEWMAN
BRENDA BURNS

IN THE MATTER OF THE APPLICATION OF GLOBAL WATER – PALO VERDE UTILITIES COMPANY FOR THE ESTABLISHMENT OF JUST AND REASONABLE RATES AND CHARGES FOR UTILITY SERVICE DESIGNED TO REALIZE A REASONABLE RATE OF RETURN ON THE FAIR VALUE OF ITS PROPERTY THROUGHOUT THE STATE OF ARIZONA.	DOCKET NO. SW-03575A-12-_____

Direct Testimony

of

Trevor T. Hill

July 9, 2012

TABLE OF CONTENTS

I. Introduction 1

II. Overview of rate application 1

III. ICFAs, Acquisition Costs, and Rate Base 9

IV. FATHOM 11

I. Introduction.

Q. Please state your name and business address.

A. My name is Trevor T. Hill. My business address is 21410 North 19th Avenue, Suite 201, Phoenix, Arizona 85027.

Q. By whom are you employed and what is your position?

A. I am President and Chief Executive Officer of Global Water Resources, Inc. ("Global Parent") and Global Water Management, LLC ("Global Management"). I also serve as the President of all of Global Parent's regulated subsidiaries (the "Global Utilities"). I will refer to Global Parent, Global Management, and our regulated subsidiaries as "Global Water."

Q. Please describe your background and qualifications.

A. A statement of my background and qualifications is included as Attachment Hill-1.

II. Overview.

Q. Please provide an overview of this case.

A. Without a doubt, the last Global Water rate case was all about the Infrastructure Coordination and Financing Agreements ("ICFAs") between Global and developers, and the accounting treatment for those innovative contracts was the focus of the parties. That's understandable, but as Global Water enters its second general rate case, our hope is that we can reach agreement on the ICFA issue, and focus on the issues that matter most to our customers, our communities, our economy, and our environment.

At Global Water we achieve our mission of Total Water Management by relentlessly focusing on three things: Results, Ratepayer Protections, and Efficiency.

This rate case, I hope, will move beyond the ICFA debate and examine whether or not Global Water is achieving its mission and will evaluate our results, the steps we take to protect ratepayers from price increases and water scarcity, and our efforts at increasing efficiency across the spectrum of our operations.

Q. Please discuss what you mean by results.

A. Results include saving groundwater using our Total Water Management philosophy, and taking over troubled water companies using developer funds.

With Total Water Management, Global Water plans and develops water infrastructure that serves water-scarce regions. In the City of Maricopa, we have fully emplaced Total Water Management – as a result, we have saved 3 billion gallons of groundwater in a community of over 43,000. We serve about 17,000 homes in that City and we have saved 176,470 gallons of groundwater per home in less than ten years since we began service there.

Let's put that in context: Santa Cruz water customers use 6,726 gallons a month on average – that means we have saved a 26-month supply of groundwater for each home in the City in less than ten years. *Those are results that matter.*

In Willow Valley and western Maricopa County, we took over the operation of the troubled West Maricopa Combine (WMC) utilities in 2006. We bought WMC using ICFA funds. After our acquisition we discovered unchlorinated drinking water was being delivered in a system with a history of positive coliform samples, and we found evidence of fraudulent water testing, illegal utility hookups, and systems plagued with problems after decades of inadequate maintenance. Ron Fleming will discuss the condition of those utilities, and will provide a complete review of our efforts and investment in fixing those

systems, implementing arsenic remediation, robust water testing, and restoring customers' ability to trust that the water coming out of the tap is safe for their family.

In Pinal County, we took over the operation of the 387 Water and Wastewater Domestic Improvement Districts in a period the Commission itself called "an emergency."[1] Customers had moved into brand new homes in a new subdivision, only to find that the water wasn't safe to drink and the wastewater system wasn't hooked up – so their sewage was pooling in the mains under their streets and was later "vaulted and hauled" away for treatment. It seems long ago to many people, but not to me, I remember hearing how those people felt after they had moved into a new home only to find themselves in a third world situation.

We bought the assets used by 387 with ICFA funds, and immediately went to work by taking the 387 well out of service, connecting the homes to our water system and connecting their homes to our wastewater system as well. All during that time, we provided bottled water and constant communication and we fixed the situation within weeks. Mr. Fleming and Mr. Walker will explain this situation and the results we achieved in greater detail.

Q. Please discuss ratepayer protections.

A. Ratepayer protection comes in many forms including critical water resource management and efficiently operated utilities. Beyond these staples of Global Water, we developed and implemented a low-income ratepayer plan in its last rate case. In this rate case, we are taking an even more aggressive step to shield our customers from the impacts of increasing rates: <u>We are stipulating to a cap of approximately 5% per year for the median residential</u>

[1] Decision No. 68498, Finding of Fact No. 37; and Decision No. 70133, Finding of Fact Nos. 7 and 59.

customer in Santa Cruz and Palo Verde. Mr. Fleming will explain the reasons for our Memorandum of Understanding (MOU) with the City of Maricopa – the benefits we have pledged and delivered to the City and our customers, and the public interest in adopting our cap and the MOU fees.

It also means considering and responding to our customers by reacting to their feedback. In the last rate case, our customers made it clear that they were not pleased with our customer service; we took this criticism to heart and we have made major customer service improvements through our FATHOM offering that I will discuss in some detail in this testimony, and Ed Borromeo will discuss in greater detail in his.

Finally, we continue to innovate with our "Rebate Threshold Rate" – the only rate design I am aware of in Arizona or the U.S. that provides customers a direct rebate for reducing water usage. Normally when utilities talk about the effects of conservation they do it by telling the Commission something along these lines: "We got our customers to conserve, now give us more money."

Global's Rebate Threshold Rate works a different way, we tell our customers: "Here's the average water use in your community, get your use below 90% of that, and we will pay you." To date, we have rebated over $1 million to our customers and our water savings in Maricopa are now over 3 billion gallons saved by 15,000 homes in less than ten years. Ron Fleming will discuss this vital ratepayer protection further in his testimony.

Q. Please discuss the impact of the last rate case on Global.

A. Nobody wants to see their rates increase, but the reality is that Global Water's last rate case had disastrous results for our company – we wound up with an $85 million net loss in 2010 as a result of the Commission's decision to disregard acquisition costs and assign every

dollar of developer funding to plant – and none of it to the acquisition premiums that all parties agreed existed. As a result, we have nearly $300 million in plant, but only about $100 million in rate base. That is simply unsustainable.

In addition to the rate base cuts, the Commission in late 2010 decided to slash the returns for investors in Arizona's water infrastructure – the same Commissioners who voted to give APS an 11% ROE *and* five adjustor mechanisms, decided that water companies with *no* adjustor mechanisms should receive ROEs lower than any other state in America. That is simply unsustainable.

In our last rate case we wanted to mitigate the impacts on customers – so we stipulated to the Staff's 10% ROE, and even after the ALJ decided to cut that ROE to 9.8% we understood and were willing to take that ROE. But at the Open Meeting, in the very last hours of a two-day debate, the Commission decided to slash our ROE to 9.0%. Investors are more risk averse than at any time in American history – there is a massive, unprecedented and continuing worldwide flight away from risk. This state, more than any other state, needs investment in water resources and infrastructure, yet the returns offered are far too low to attract and retain investors. That is simply unsustainable.

Those decisions – to slash our investment by applying every dollar of ICFA to plant and none to our real, proven acquisition costs that benefited customers and developers, and to force our investors to take an $85 million net loss; and to hand out an ROE that (until the Liberty Water decision shortly after) was lower than any ROE in America – <u>those are the reasons for this rate case</u>.

I regret that on many levels. First, it is profoundly unfair to our customers. We are peeling the Band Aid twice – collectively we are forcing the community to go through the anxiety

of rate increases once again, this time simply to rectify a grave injury. Global Water is willing to voluntarily capping its annual rate increase in our largest utilities, Santa Cruz and Palo Verde. But the Commission needs to repair the damage.

Q. Please discuss customer service issues.

A. In our last rate case, hundreds of customers attended the public comment session. I attended that session with my entire management team – and I was shocked to hear the level of dissatisfaction with our customer service. That night, after the session had ended, I gathered my team for a long late-night meeting to begin fixing our mistakes and provide our customers with the customer service they deserve.

We launched a massive effort in that regard. We increased our customer service hours, we upgraded our call center technology, and we introduced IVR technology to reach out to customers who were late with their payments. We put in a new, more holistic, approach to customer disconnects and reconnects. We launched a new, more customer friendly and useful account management website U2YOU (Utility to You), and we have introduced the industry's first smart phone applications. The website and the apps both notify customers of bills and ways to pay, and provide customers with greater and timelier information about their water usage.

Those new approaches are epitomized in our FATHOM product which provides state of the art customer outreach, customer service, bill reading, usage monitoring and multiple ways for customers to understand their bill, manage their usage, <u>and save money and water</u>.

Global Water's customers can now access and manage their accounts from their computer, their smart phone, and computer kiosks in our service center. Our customers can gauge

their usage relative to their neighborhood and their community – making our water conservation messaging more useful by putting it into context. Mr. Borromeo discusses our customer service improvement in greater detail in his testimony.

Q. Mr. Hill, earlier you mentioned efficiency, please describe what you mean by this?

A. In this case we will explore new metrics for measuring water company efficiency, Ron Fleming will explain how Global has achieved the following:

- We now track and produce metrics similar to that of the electric industry metrics like SAIFI/SAIDI,
- We measure gallons sold per customer relative to industry average,
- We monitor customer calls and the efficiency of our customer service operations on a daily basis, and
- We evaluate our largest independent expense line items, such as power, labor, consumables, and repair and maintenance efficiency against industry averages.

In this rate case, we will explain how our results have protected customers and the environment, and how our ratepayer protection model eliminates rate shock while allowing our shareholders a fair return that keeps them investing in our state's future.

Q. Mr. Hill, please describe the primary considerations in this case.

A. I believe the primary considerations are Results, Ratepayer Protections, and Efficiency.

The well being of our customers, our environment, and our economy are inextricably linked. We cannot, as a State, continue to believe that customers are on the opposite side of the investors who provide infrastructure and service to customers.

We cannot continue to act as if the environmental realities of life in the Sonoran Desert can be ignored because sometimes it rains a lot, and when it doesn't we will always have cheap, plentiful CAP water to bail us out. We cannot continue to build and emplace water systems that pump groundwater, treat it to EPA standards, and dump it on grass.

We cannot continue to look at maps that show hundreds of small, undercapitalized water companies that almost perfectly mirror the growth corridors where hundreds of thousands of people will live and assume that somehow it will all work out. We must consolidate our water management into large, well-capitalized, highly regulated utilities, and then, we must demand that those utilities prove real results in saving our state's groundwater.

And as we do those things – consolidating and professionalizing our water management and saving groundwater by putting the right water to the right use – we must demand and expect utilities to empower their customers by providing them meaningful tools and data to manage and control their utility bill.

In this case, we hope to rectify the impacts of the last decision – assigning ICFA revenues to acquisition costs, and providing our investors with a fair return and incentives to invest in results, ratepayer protections, and efficiency.

And as we reach that outcome, every party and every customer should bear in mind that in our largest utilities (Palo Verde and Santa Cruz) we are voluntarily capping any year's increase for the median residential customer. Global Water is continuing to use Total Water Management to save billions of gallons of groundwater. We are continuing to pursue and provide better options and tools for our customers to manage their bills and their water usage. And we continue to exceed industry metrics for the most important elements of water utility service.

I hope that the outcome of this case will be radically different than our last. Our investors need an outcome that restores their investment. Our state needs tools like the ICFA that shield customers from the costs of the consolidation and regionalization that life in the Sonoran Desert demands. And we should, as a state, provide incentives that will encourage investors and water utilities to invest in, focus on, and improve water management, ratepayer protections, and tangible, measurable results in efficient operations.

III. <u>ICFAs, Acquisition Costs, and Rate Base.</u>

Q. Why did Global use ICFAs?

A. Global Water entered Arizona's water scarce, fast growing, Pinal and Phoenix AMAs because there was a massive need for Total Water Management. The Arizona Department of Environmental Quality and the Arizona Department of Water Resources have each sent letters to the Commission explaining why they urged Global Water to enter the West Valley. Developer after developer asked Global Water to acquire undercapitalized, poorly run, and water-only systems that simply could not provide water certainty in those AMAs, so that with Global's resources and innovation economic growth and water sustainability in the West Valley could advance.

We used ICFAs, in part, as a tool to fund these acquisitions we needed to serve these new, fast-growing areas.

Q. Please discuss acquisition premiums.

A. An acquisition premium is the amount paid to buy a utility, over the rate base value of the utility. We incurred tens of millions of dollars in acquisition premiums to purchase utilities in high-growth regions of Arizona. These utilities were completely unprepared for growth and faced serious operational and compliance problems. The serious issues these

utilities – and their customers – faced are explained in the testimonies of Ron Fleming and Paul Walker. I urge you to take a look at it; you will be shocked by the conditions of these utilities, some of which posed a direct threat to public health and safety. Global acquired these companies and fixed their problems. We could not do so without paying acquisition premiums.

Q. How can we know how much Global paid in acquisition premiums?

A. Our Deloitte & Touche audited financial statements demonstrate the amounts of those acquisition premiums.

Today, we have an ACC-commissioned audit underway by Ullman & Company, CPAs, which is exploring and examining our books, records, contracts, costs, and ICFA income. The Ullman audit will verify the amount we paid and the acquisition premiums as well.

Q. Why should the Commission make a decision now about ICFAs?

A. The Commission has addressed and discussed ICFAs in great depth – in the 2006 generic docket, in the Arizona Water complaint proceedings, in Global's last rate case, and in the Workshop process. This case is the moment when the ICFA issue must be fully resolved.

Q. Why should the Commission reverse its decision treating all ICFA funds as CIAC?

A. In short, because of acquisition premiums. When Global uses ICFA funds to pay for an acquisition premium, those funds are not invested in rate base. Thus, deducting the funds from rate base is "double counting", and the Commission is taking the most viable tool for consolidation off of the table – the idea that developers should contribute. Paul Walker explains these issues in greater detail in his direct testimony.

Ultimately, I believe that by assigning ICFA revenues to acquisition costs, this State can enact a policy that makes growth pay for growth and protect today's customer from paying the costs of tomorrow's growth.

IV. FATHOM.

Q. What is FATHOM?

A. It is comprehensive suite of technologies and services offered by Global Water Management to our own utilities and to utilities throughout the United States, and now, internationally.

Q. How did FATHOM come about?

A. To understand FATHOM, it is important to remember Global Water's main initiatives: Total Water Management, Customer Service, and Efficient Operations.

Global Water was founded and developed around the idea of Total Water Management ("TWM"). TWM is a mechanism to offset demand for high quality potable water with an integrated approach to water using potable water, wastewater and recycled water. As I explained in the last rate case Total Water Management is Global Water's approach to managing scarce water resources in high-growth areas. A key tenet of Total Water Management is the use of recycled water for non-potable purposes, such as irrigation of parks, common areas, medians, and even residential yards. We described our approach in our book, *Total Water Management: Resource Conservation in the Face of Population Growth and Water Scarcity*. A copy of our book is available at: http://www.gwresources.com/pdf/twm.pdf

The impacts of climate, growth, and demographic migration all point to water scarcity as the fundamental issue to be addressed in Arizona's future. Energy and gas can be

transported over large distances relatively inexpensively. Water has such a profound cost of transportation that it must remain a regional issue – managed locally for the benefit of residents.

In *Total Water Management,* we make the case that by using recycled water, surface water, and recharge, utilities avoid exposure to the non-controllable costs of energy and treatment. We prove that recycled water and surface water use can and do massively reduce groundwater consumption. And we demonstrate that recycling wastewater rather than relying only on recharge not only reduces costs but it maintains aquifer quality.

The final point of the book is that Total Water Management succeeds when implemented on a regional scale. This is where the Commission plays an enormous role; in fact the Commission will determine whether regional operations arise in water management. And in making that determination, either through action or inaction, the Commission will decide whether or not Arizona's future involves Total Water Management.

Total Water Management is, as you can see, focused on the supply side of the resource curve – and over the past decade we have proven its effectiveness by saving over 3 billion gallons of groundwater in the City of Maricopa.

As I pointed out earlier in my testimony, 3 billion gallons of groundwater is 176,470 gallons per home – enough to provide each home in that community with over two years of groundwater. In a ten year span, starting with only about 1,000 homes, we have saved an extraordinary amount of water.

With FATHOM, Global Water is now addressing the other half of the resource curve: Demand. And we are going to achieve equally remarkable things on that side of the curve.

To begin, we began a massive effort to perfectly calibrate all our meters, from pumps to houses, and to identify, record, and understand exactly where every gallon went. We emplaced sophisticated AMI and SCADA instrumentation. Our engineers digitized our entire collection and distribution system infrastructures, providing our field technicians with instant access to real time operational data, as well as all related asset records including the as-built drawings of every component of our system.

In short, we unified numerous utility practices and management applications into a single technology platform and integrated the data. And with that we began to make our operations even more efficient, and that even with a relatively new system we hadn't been measuring water perfectly. Now we are. At first, we were shocked to see that our water loss wasn't anywhere near as low as we thought it was. We realized that we weren't losing more water – we were simply measuring it better.

In our conversations with water providers throughout the world, from Australia to France, to England, and throughout the United States we realized that utilization of today's technology and data management was not nearly what it should be. When we realized that, we also realized that other water providers were also not providing the level of ratepayer protections and efficiency that we had attained – so we launched FATHOM.

FATHOM marries Geographic Information Systems (GIS), Automated Metering Infrastructure (AMI), Customer Service, Asset Management and Data Management into one product.

Q. What customers use FATHOM today?

A. We just entered into an agreement with Thames Water, one of the largest water companies in the world, to provide FATHOM services to some of their largest accounts in England. We have signed contract with the California cities of Torrance, Grass Valley, Covina, El Cajon, and others to provide them with FATHOM for their customers. In addition, we provide FATHOM services to our regulated utilities.

Q. What does FATHOM cost your customers?

A. In our regulated utilities, FATHOM costs about at about $3.50 per account per month. As demonstrated in detail in Ed Borromeo's testimony, our regulated customers are getting the FATHOM services at a rate far below the market value and in fact, below cost in some cases.

Q. Mr. Hill, do you have any concluding remarks about FATHOM?

A. Today, with Total Water Management and FATHOM, Global Water is, we believe, the only water utility in the world that has married supply-side management that yields remarkable reductions in water use but also demand-side management that provides extraordinary detail and puts that into customer-centric tools like our alert notifications and iPhone and Android apps that allow every home to monitor and manage its water use.

In my mind that is what we should do – and it's what I hope the Commission will reward and incent in this case.

We are all living in an extraordinarily difficult economy – but we have technology that can protect our customers in ways nobody could have envisioned. I did not foresee that the iPhone would change phones into portable computers – allowing customer interfaces and outreach that allow us to work with customers to control usage and bills; but that day has

arrived and Global Water is proud to be leading the effort to use that technology to better manage water, system operations and repairs, billing and customer service.

Q. Does this conclude your direct testimony?

A. Yes.

GLOBAL WATER

Trevor T. Hill, P.Eng.
President & CEO, Global Water Resources, LLC

Raised in Vancouver, British Columbia, Mr. Hill graduated in 1987 from Royal Military College with a Bachelor of Engineering in Mechanical Engineering. Mr. Hill attended the Royal Naval Engineering College in Plymouth, England where he completed his post-graduate studies in 1988. He served with the Canadian Navy as an Engineering Officer retiring in 1994 after serving as Deputy Engineering officer in HMCS Huron in the Gulf War 1991 where he was decorated with the Gulf Kuwait Medal.

In 1994 Mr. Hill co-founded Hill, Murray & Associates, a design-build-operate firm specializing in the construction and operation of water reclamation facilities in British Columbia and the Canadian Arctic. Mr. Hill oversaw the permitting, design, construction, commissioning and operation of many "first-in-the-field" systems, including the first fully recycling commercial and school buildings in Canada. He has been instrumental in developing water reclamation codes, rules and regulations for the Province of British Columbia, and advancing water stewardship through his Total Water Management philosophy. In 2000, Mr. Hill co-founded Algonquin Water Resources of America, a division of the Algonquin Power Income Fund. In his role of Director of Operations for AWRA, he led the acquisition team, acquiring 6 utilities in three years and amassing 37,000 utility customers in Arizona and Texas.

In 2003, Mr. Hill co-founded Global Water Resources, an Arizona-based company established to acquire regulated water and wastewater utilities in the arid Southwestern states and to advance the cause of water reclamation and reuse as a conservation methodology. Mr. Hill provides leadership and policy direction with respect to water reclamation and re-use, water use efficiency and the economics of water reclamation and served on the Governor's Blue Ribbon Panel on Water Sustainability. Global Water has been recognized for its leadership in water conservation, environmental education and communications receiving the 2009 Environmental Achievement Award in Region 9 of the Environmental Protection Agency.

In 2009 Global Water launched FATHOM™, a technology enabled software-as-a-service platform designed to provide state of the art back-office services to municipal water utilities and in 2010 received the Governor's Green Innovator of the Year Award at the Arizona Governor's Celebration of Innovation.

In 2010, Mr. Hill led a $65 million Initial Public Offering on the Toronto Stock Exchange. The Global Water IPO was the largest Cleantech IPO in 2010, and Global is now the largest pure-play water company listed on the TSX – TSX: GWR.

Occupational Summary

- 2003 – Co-Founder, President & CEO, Member of the Board of Directors, Global Water Resources
- 2001 – Co-Founder, Director of Operations, Algonquin Water Resources of America
- 2000 – General Manager, Water Division, Conor Pacific Environmental
- 1994 – Founder, President and CEO, Hill, Murray & Associates Inc.
- 1991 – Marine Systems Engineering Officer, Naval Engineering Unit Pacific
- 1988 – Deputy Engineering Officer, HMCS Huron

Credentials, Affiliations

- 2011 – Member, Board of Directors, Clean Water America Alliance
- 2010 – Member, ADWR Fees Stakeholder Advisory Group
- 2010 – Member, Public Perceptions Subcommittee, Governor's Blue Ribbon Panel on Water Sustainability
- 2010 – Member, Governor's Blue Ribbon Panel on Water Sustainability
- 2009 – Member, Board of Directors, Maricopa Economic Development Association (MEDA)
- 2008 – Member, Young Presidents' Organization ("YPO"), International and Sonoran Chapter
- 2008 – Member, Greater Phoenix Economic Development Council
- 2008 – Member, Arizona Investment Council
- 2008 – Member, Board of Directors, WESTMARC
- 2008 – Member, External Advisory Board, Maricopa County *Green Initiative Program*
- 2007 – Member, Canada Arizona Business Council Board of Directors
- 2007 – Member, Utility Communicators International
- 2007 – Member, Valley Forward
- 2007 – Member, Board of Directors, Pinal Partnership
- 2006 – Member, American Water Works Association
- 2006 – Advisory Board Member, Arizona Water Institute External Advisory Board
- 2006 – Member, Pinal County Drought Impact Task Force
- 2006 – Board Member, Investor Owned Water Utilities Association (IOWUA)
- 2005 – Member, WateReuse Association
- 1989 – Registered Professional Engineer, British Columbia
- 1988 – Post Graduate Studies, Royal Naval Engineering College, Manadon, UK
- 1987 – B.Eng. - Mechanical Engineering, Royal Military College, Kingston

Awards/Honours

- 2011 – AZ Water Association – Santa Cruz Water Company, Small Distribution System of the Year; Palo Verde Utilities Company, Small Collection System of the Year and Small Wastewater Treatment Plant of the Year
- 2010 – Governor's Celebration of Innovation – Green Innovator of the Year Award for Global Water FATHOM
- 2009 – US Environmental Protection Agency (EPA) Region 9 Environmental Achievement Award
- 2008 – Phoenix Business Journal and BestCompaniesAZ, 2008 Best Places to Work in the Valley - Medium Business Category
- 2008 – Phoenix Business Journal, 2008 Power Player
- 2008 – WateReuse Public Education Award of Merit
- 2008 – WP Carey School of Business, Spirit of Enterprise Award Finalist
- 2008 – 29th Annual Telly Awards – Two Bronze Awards ("Water Crisis" and Global Water Center LEED Certified Videos)
- 2008 – Utility Communicators Awards: First Place Award – Single Newspaper Ad; First Place Award – Series of Newspaper Ads; Second Place Award – Potpourri (Water Crisis Video); Best of Show – Newspaper /Magazine Ad
- 2008 – Entrepreneur Magazine's Hot 100 of 2007 - Ranked #5
- 2008 – State Compensation Fund, Best of the Best 2007
- 2008 – Arizona ADDY® Award (Bronze), Consumer or Trade Publication/Four Color Print Campaign
- 2007 – Phoenix Business Journal and BestCompaniesAZ, 2007 Best Places to Work in the Valley - Medium Business Category
- 2007 – Arizona Business Magazine, Economic Engine of Arizona Award
- 2007 – Valley Forward Crescordia Award, Environmental Education/Communication - Private Sector
- 2007 – Valley Forward Award of Merit, Buildings and Structures - Industrial and Public Works
- 2007 – Utility Communicators Award of Distinction - Awards Print Competition
- 2007 – Arizona Small Business Association Spotlight Award - Commerce
- 2007 – Arizona Small Business Association's 50 Companies to Watch Award
- 2007 – Ernst & Young Entrepreneur of the Year, Orange County Division
- 1999 – Top 40 Under 40 Award, Business in Vancouver, January 1999
- 1998 – ZENON Merit Award for Design, October 1998
- 1998 – Finalist, Entrepreneur of the Year Award, Pacific Region, Canada, October 1998
- 1997 – BC Ministry of Environment, Lands and Parks, Minister's Environmental Award, Business/Industry Category
- 1997 – Nominated, Entrepreneur of the Year Award, Pacific Region, Canada
- 1996 – ZENON Merit Award for Design
- 1991 – Decorated, Gulf Kuwait Medal
