ORIGINAL

Dear Chairman Stump & Commis

I am a TEP customer in Tucson and am an ardent supporter of energy conservation and low/no carbon renewable energy. My family and I have personally used energy rebates to help us save money on our air conditioning costs. I also know at least a dozen of our friends who have used available rebates and credits to install efficient windows, add insulation & weatherstripping etc. and as a result have improved their living environment in addition to reducing their monthly energy costs.

I am therefore very troubled to learn that the ACC has not approved TEP's efficiency plan and has delayed programs to conserve electricity and save Tucsonans money.

Weatherization, Energy Star lighting, home energy assessments and other programs that support energy efficiency reduce pollution and protect the interests of all ratepayers into the future.

Please fully fund these efficiency programs and expand them as part of any rate case agreement approved by the Commission

Sincerely,

Warren Deming
