OPEN MEETING AGENDA ITEM

Dear Chairman Stump and Fellow Commissioners,

I am a TEP ratepayer who is deeply concerned about climate change. I believe we need to reduce the use of fossil fuels as quickly as possible, in order to reduce greenhouse gas emissions. Any and all programs to move in this direction should be encouraged.

One of the most cost-effective ways to reduce energy use from fossil fuels is through energy efficiency. I strongly support energy efficiency programs as the quickest and easiest ways to reduce greenhouse gases in our environment.

I urge you to fully fund all energy efficiency programs as part of the decision on the TEP rate case. As a renter, I would certainly like to see more done for this segment of the population. I'm also very interested in tree-planting on a massive scale to reduce the urban heat island effect and consequently reduce the demand for electricity in the summer, with the added benefit of natural beauty in our environment.

Please carefully consider and vote in support of these measures. Thank you.

Yours truly,

Susan Willis
