AZ CORP COMMISSION
DOCKET CONTROL

Dear Commissioners,

This letter is regarding the TEP rate case, docket 12-0291.

I am a TEP ratepayer. The house I rent is about as energy-efficient as a convertible sports car. We have a doorway with no door and a window with no glass that open into a large, uninsulated storage room. This leads to cold winters and scorching summers, despite our functional A/C and heating systems.

Last year I was at a public event where the local electricians union was tabling. I picked up a TEP home energy efficiency audit brochure, and was excited to start to address the problems with my house. When I called the number, I was told the program had been cancelled.

Now TEP has re-started their energy efficiency programs more than two years after they first submitted their plan to the Commission. Please support energy efficiency in Arizona and in Tucson by supporting the energy efficiency standard for Arizona unanimously adopted in 2010.

Arizona Corporation Commission
DOCKETED
JUN - 6 2013
DOCKETED BY

and by voting to approve the energy efficiency implementation plan for TEP.

In the long run, energy efficiency programs save money for me on my utility bills, and for the state of Arizona.

Please do the right thing and support energy efficiency.

Sincerely,

Daniel Millis
