Docket E-00000C-11-0328 Smart Meters

Dear Commissioners:

Concerning public health, due to the overwhelming preponderance of evidence against wireless transmissions, such as that found in the 2012 Bioinitiative Report, I request that the Commission make these recommendations operable in Arizona:

1) Opt-outs available to all utility customers.
2) Nominal opt-out fees, such as Tucson Electric Power's $5 monthly fee.
3) Waived opt-out fees for low income persons.
4) Opt-out customers retain the same legal rights as other users.
5) Use smart meters solely for utility metering and management.

Sincerely,
