Re: Notice of Filing – Tucson Electric Power Company's Resource Planning Filing of Historical Data 2013; Docket No. E-00000V-13-0070

Pursuant to Arizona Administrative Code R14-2-703, Sections A and B, Tucson Electric Power Company ("TEP") hereby files its 2014 Resource Planning and Procurement Filing for the historical year 2013. This filing and TEP's electronic hourly load data contain confidential information that is being provided directly to Commission Staff pursuant to the terms of the Protective Agreement executed in this docket.

If you have any questions regarding this filing, please contact me at (520) 884-3680.

Sincerely,

Jessica Bryne

2014 Resource Planning and Procurement Filing

2013 Historical Data Information

A.A.C. R14-2-703

TABLE OF CONTENTS

A. Demand-Side Data

A load-serving entity shall, by April 1 of each year, file with Docket Control a compilation of the following items of demand-side data, including for each item for which no record is maintained the load-serving entity's best estimate and a full description of how the estimate was made:

1. Hourly demand for the previous calendar year, disaggregated by:
   a. Sales to end users;
   b. Sales for resale;
   c. Energy losses; and
   d. Other disposition of energy, such as energy furnished without charge and energy used by the load-serving entity.
2. Coincident peak demand (megawatts) and energy consumption (megawatt-hours) by month for the previous 10 years, disaggregated by customer class;
3. Number of customers by customer class for each of the previous 10 years; and
4. Reduction in load (kilowatt and kilowatt-hours) in the previous calendar year due to existing demand management measures, by type of demand management measure.

B. Supply-Side Data

A load-serving entity shall by, April 1 of each year, file with Docket Control a compilation of the following items of supply-side data, including for each item for which no record is maintained the load-serving's best estimate and a full description of how the estimate was made.

1. For each generating unit and purchased power contract for the previous calendar year:
   a. In-service date and book life or contract period;
   b. Type of generating unit or contract;
   c. The load-serving entity's share of the generating units capacity, or of capacity under contract, in megawatts;
   d. Maximum generating unit or contract capacity, by hour, day, or month, if such capacity varies during the year;
   e. Annual capacity factor (generating units only);
   f. Average heat rate of generating units and, if available, heat rates at selected output levels;
   g. Average fuel cost for generating units, in dollars per million Btu for each type of fuel (REDACTED);
   h. Other variable operating and maintenance costs for generating units, in dollars per megawatt-hour (REDACTED);

i. Purchased power energy costs for long-term contracts, in dollars(REDACTED);

j. Fixed operating and maintenance costs of generating units, in dollars per megawatt(REDACTED);

k. Demand charges for purchased power(REDACTED);

l. Fuel type for each generating unit;

m. Minimum capacity at which the generating unit would be or power must be purchased;

n. Whether, under standard operating procedures, the generating unit must be run if it is available to run;

o. Description of each generating unit as base load, intermediate, or peaking;

p. Environmental impacts, including air emission quantities (in metric tons or pounds) and rates (in quantities per megawatt-hour) for carbon dioxide, nitrogen oxides, sulfur dioxide, mercury, particulates, and other air emissions subject to current or expected future environmental regulation;

q. Water consumption quantities and rates; and

r. Tons of coal ash produced per generating unit.

2. For the power supply system for the previous calendar year:

   a. A description of generating unit commitment procedures;

   b. Production cost;

   c. Reserve requirements;

   d. Spinning reserve;

   e. Reliability of generating, transmission, and distribution systems;

   f. Purchase and sale prices, averaged by month, for the aggregate of all purchased and sales related to short-term contracts; and

   g. Energy losses.

3. The level of self generation in the load-serving entity's service area for the previous calendar year; and

4. An explanation of any resource procurement processes used by the load-serving entity during the previous calendar year that did not include use of an RFP, including the exception under which the process was used.

NOTES:

(1) Sundt 4 reflects operation on coal. The unit is primarily run on coal with a 110 MW capacity.

(2) Reflects station cost $000

(3) Production cost based on fuel cost only $000.

(4) Estimated Fuel Cost Allocation. Net of System-wide gas hedging costs.

(5) Based on Dispatched Heat Rate

(6) Unit 4 entered service in 1969 with the ability to fire on Natural Gas or Diesel. In 1988, it was converted to run on Coal or Natural Gas.

Notes:

SO2, NOx and CO2 based on CEMS for units so equipped, and generation- or heat input-based emission factors for other units

Paticulate matter and mercury for coal stations are based on representative emission measurements times 2013 heat input.

Water consumption for coal stations are based on plant-wide consumption prorated to TEP ownership.

Paticulate matter, mercury and water consumption for natural gas facilities are based industry average rates for similar units times 2013 station output.
