AZ CORP COMMISSION
DOCKET CONTROL

ORIGINAL

Docket No. E-01345A-13-02

Dear Jodi Jerich,
Executive Director

I am a concerned citizen very alarmed by the proposal before the Corporation Commission on net metering and subsidizing solar power.

I strongly oppose this push for net metering or for any solar power subsidy! If these proposals are adopted, the results would prove detrimental to free market enterprise and would be a financial hardship to those least able to afford it!

Please oppose any such proposals!

As a healthcare provider, I am well aware of the unexpected (and negative!) outcomes that will ultimately be realized by the public, when government puts itself in control! Please do not bring about the same with our public utilities.

Subsidizing solar power and compensating solar users at the expense of non-solar users is not fair or sustainable!

Please be a voice of reason when this matter comes before the Commission and oppose net metering for Arizona. Thank you for your kind consideration.
