To the Executive director;

The rates in Sun City are going to get high, this summer, where many of the people in original Sun City are going to have trouble paying the bill on electricity and water they may not be able to stay here. Due to the fact that many of the people in S.C. go back to another home outstate, they dont face these higher bills but those of us who live here year around may face a summer with extreme rates on many things. I have a pool that was at home we purchased around 12 years ago because I have skin condition and do not consider using the Rec Center pool. Our bills have been reasonable all these years but now are increasing steadily. Please consider these facts when Epcor asks for a rate increase this time.

Thank You

Robert G. Anderson
