2. THE COMPANY

ERC Investments LLC (the "Company") was formed on April 21, 2011 as an Arizona LLC. At the date of this offering One Thousand (1,000) of the Company's Membership Units were authorized, issued and outstanding. The Company is in the business of investing in waste management, recycling and bio-fuel production and the purchase and selling of commodities.

2.1 OPERATIONS

A recycling plant is a facility which collects and processes materials for recycling. Recycling plants may be attached to landfills to streamline the waste management process, or they may be independent facilities. The goods handled at a recycling plant are quite varied, depending on regional demand for specific materials, and the capacity of the plant itself.

Recycling is a complex process, which starts with a consumer dropping a recyclable object or container into a designated recycling bin. Once that object reaches a plant, it is dumped onto a conveyor with numerous other items for sorting. Sorted goods are divided by type, so that like can be recycled with like. After sorting, the goods are usually cleaned, so that they are ready for the recycling process.

Melting, shredding, and pulping are all used to prepare things for recycling. Glass tends to be chipped and then melted so that it can be made into new glass objects, although some recycling plants also offer bottle reclamation, in which bottles are sterilized for reuse. Shredding is used to package plastic, metal, and paper for processing, while pulping is used to convert paper products into slurry which can be made into paper all over again.

Once objects have been broken down at a recycling plant, they can be made into products from recycled goods.

The buying and selling of commodities is also a part of operations. Items, such as locomotives can be purchased, usually in bulk, and then stripped at the facility. This process results in both metal to be sold as a commodity and salvaged parts are sold on the open market.

TRI-CORE COMPANIES, LLC BUSINESS PLAN

Mission Statement

The mission of Tri-Core Companies, LLC (the Company) is to purchase raw virgin beach front land on the Gulf of California (Sea of Cortez), Sonora, Mexico for either resale or for development.

The specific location the Company has concentrated on is generally between El Golfo de Santa Clara on the north and Puerto Peñasco (Rocky Point) on the south. This is a distance of about 80 miles and is being opened for development with the completion of the Coastal Highway that will make access by automobile to this virgin area easy for millions of visitors and buyers from the United States. The Company believes there will be a major increase in demand for property in this area with the completion of the highway. The highway is over four-fifths complete, and only a 15 mile portion of the center section remains to be completed which is scheduled for completion by Spring 2008.

If property is being purchased for resale, profitability will be generated by acquiring the virgin property and performing the following functions:

- Privatize the property, if necessary
- Create the preliminary plat plan
- Apply for and obtain the necessary permits and approvals from the several governmental agencies
- Submit the final plat plan for and obtain approval

If property is being purchased for development, the same steps noted above are still necessary. However, profitability would be further enhanced by:

- Completion of the infrastructure (roads, water, sewer, etc.)
- Selling individual lots or commercial parcels that would be ready for vertical construction
- Forming a joint venture with residential builders
- Forming a joint venture with a commercial builder
- Complete or partial build out by the company (depending on scenarios noted above)

The Company's choice for either scenario noted above will be influenced and driven by the market as demand for the area increases in direct correlation to the completion of the Coastal Highway.

Knowledge of the Marketplace

The Principals of the Company have been active in Mexican real estate for several years and consider the El Golfo/Rocky Point market one of the (if not the most) active markets in all of Mexico for development and potential upside investment.

Because of their experience and knowledge base, The El Golfo area was chosen for the Company's initial purchase due to its potential concentration and upside appreciation. Some of the driving factors that influenced this decision were:

- Its close proximity to the United States markets (one hour drive from the Border of US/Mexico)
- Its location on a beautiful, pristine, major body of water
- The quality of the sand beaches
- The scenic mountain views of the Baja Peninsula
- The opening of the area by the construction of the Coastal Highway from the US/Mexico border 300 miles to the south along the coast of the Sea of Cortez to Guaymas, Mexico, a major seaport
- The $50 million dollar international airport under construction at Rocky Point that will accommodate all types of passenger planes. The first runway is to be completed in 2007 and the balance completed by 2009.
- Two state-of-the-art hospitals, Hospital of Penasco and the IMMS Hospital are currently under construction and will serve the El Golfo/Rocky Point areas

The primary target market is baby boomers and younger persons from Southern California, Arizona, and Nevada as buyers of property for weekends and vacations due to the close proximity to the U.S. States. Another large market to be targeted is the "Snow Bird" buyer/users looking for a winter vacation location from all over the United States and Canada. Other markets include buyers/users living in Mexico, and investors looking to put money into an area that is being labeled "the Sonoran Riviera."

The Mexican and Sonoran Governments are dedicated to promoting the area as a major destination for both Americans and Canadians. This is evidenced by the millions of dollars of infrastructure being put in place by the United States and Mexican Governments. A prime example of this dedication is the Coastal Highway. This three hundred mile highway is being built at a cost in excess of $200 million dollars and will connect the port city of Guaymas in Mexico with the US/Mexico border at San Luis Rio Colorado, south of Yuma, Arizona. The highway is two-thirds completed and will be finished in late 2007. This will make this whole area much more accessible for millions of Americans in Southern California, Arizona, and Nevada for weekends and vacations, as well as longer stays for all of the US and Canada.

La Escalera Nautical, or the "Nautical Ladder," is a widely known plan to encourage tourism by development along the Sea of Cortez by building a series of hotels, marinas, and tourist sites located within a one day sail of one another. Fonatur, the Mexican tourism development agency, initially projected 50,000 boats and one million visitors by 2014, with the vast majority from the United States.

The Property – Lot 5 Mechor Ocampo, El Golfo

After reviewing many properties in the area over the past 12 months, the site selection was narrowed to a large land parcel in an area known as El Golfo de Santa Clara, in the Municipality of San Luis Rio Colorado, Sonora, Mexico and is nestled along the beach of the Sea of Cortez. This large land parcel (Lot 5) has over 250 acres of land with over one mile (6,000+- feet) of beautiful sandy beach frontage with rolling dunes and wonderful views of the Sea of Cortez and the mountains on the other (Baja) side of the water. The northerly portion of the site is generally level with a small fore dune about 10 to 15 feet above the beach for excellent views and is an excellent area for water front and water view single family lots. The center portion of the site has the same desirable fore dune and has a low to medium high second dune for added views for multi-family and mixed use development behind the single family area. The southern portion of the site has a high ridge that extends almost to the beach and has spectacular views from both sides down the beaches and the Sea of Cortez with the greatest views from the very top. This area is excellent for a destination resort, mixed-use residential, and supports commercial use such as restaurants, hotels, and recreational facilities.

This land was selected for its excellent location and for the following and other reasons: The land is at the southern edge of El Golfo, approximately one hour south of the U.S./Mexico border crossing at San Luis. The entire waterfront area in this section of the Sea of Cortez is undergoing major development with the building of the Coastal Highway that will provide needed access from major metropolitan areas of the United States including Arizona, Nevada, and Southern California. A new major border crossing facility is also planned for San Luis to relieve congestion at the present in-town facility; this will increase the number of inspection lanes from five to sixteen and will decrease the time for crossing the border.

The Colorado River flows into the Sea of Cortez north of El Golfo and forms a large delta area. El Golfo is near the northern end of the Sea of Cortez and is well protected from adverse weather and as a result, the waters are generally calm. El Golfo is a picturesque fishing village with long wide sandy beaches. The fishermen launch their boats from the sandy beaches directly into the water. There is at present one paved road that ends at El Golfo. The Coastal Highway from San Luis will provide needed tourist access to El Golfo and other waterfront areas. The new Coastal Highway will continue southerly to Puerto Penasco (Rocky Point) and beyond to Guaymas. The section from San Luis to Rocky Point is scheduled to be operational by early 2008 and most sections are already paved and ready for use.

The Company has acquired the 250-acre plus Lot 5 land parcel and has designated the site the *El Golfo Beach Resort* and it is in the center point of this area. The subject property overlooks the Sea of Cortez from many vantage points as well as from the over one mile of beach frontage. The area has boating, fishing, off-roading, hiking, bird watching, and other water oriented activities. Vehicles can drive along the beaches of The Sea of Cortez. The area is a major boating and recreation area for Sonora, Mexico, Arizona, Nevada, Southern Utah, and especially Southern California. Much of the land adjacent to the Sea of Cortez is owned and controlled by the Federal

TRI_C007784

and State Governments for recreation and preservation with minimum land available for private development. The Sea of Cortez waterfront areas of the State of Sonora, including the subject area, have experienced a major increase in real estate values in the past 36 months and this trend is continuing.

Water Access Lot 5

El Golfo Beach Resort is to be located on Lot 5, a site fronting 6,000+/- feet on the Sea of Cortez to the south of the Town of El Golfo. Boats can be launched from the beaches. The beaches are all sand with driving allowed along the beaches. There is a large hill with a lighthouse, called "El Mochorro," at the top that is well known and is about a ½-mile north of the subject property. The subject site has rolling sand dunes near the waterfront and is generally level toward the rear area. The site is well adapted for the launching of small boats.

The Proposed Development for Lot 5

This project is a proposed mixed-use development, including a gated single family development of 500+/- single family lots, several areas for multi-family development, and a planned destination resort with hotels, restaurants, and supporting commercial facilities. All of this fronts on and has wonderful views of the Sea of Cortez at the Town of El Golfo, in rapidly developing San Luis Rio Colorado, Sonora, Mexico. The property consists of 100+/- hectares (250+/- acres) of land on the multi-level site overlooking the scenic waterways of the Sea of Cortez to the west and with mountain views to the east. The property has over 2,000 meters (6,000+/- feet) of sandy beach frontage. There are beautiful scenic views up and down the sandy beaches on the Sea of Cortez (Gulf of California). The lots will range from 50 feet by 100 feet to lots well over an acre depending on location, views and terrain. The prime lots will be on the beach for wonderful views and easy water and beach access and at the top of the large hill near the south end of the property for spectacular views along the beaches for miles in each direction. The development will provide all the amenities associated with a destination development.

The Development Plan

The development plan is to purchase the property for cash with reserves to complete the development. The property will be developed in total or a part may be sold and the balance of the site developed for single family lots. The value of the approved subdivision will be sufficient to secure a construction funds for the cost of the off-site improvements, infrastructure and the marketing of the sites. The development will be completed in phases and we will be in the position to sell the lots to a residential builder, or individually on a retail basis in the open market.

TRI_C007785

Supporting Land Sale Prices for Lot 5

There has been a major increase in interest in land acquisition in the area between El Golfo and Rocky Point since the construction of this section of the Coastal Highway began about 24 months ago. As the highway is nearing completion, there is a greater recent increase in activity, and that will continue to increase until and after the new road is completed. The greatest interest in buying by national and international groups for development and retail end buyers will be when the Coastal Highway will provide convenient access to land parcels currently only reachable by 4x4 vehicles. The road is completed to the rear of all of Mechor Ocampo but is not yet completed to Rocky Point.

The land where Lot 5 is located is a group of beach front parcels designated Mechor Ocampo and planned for tourism development. This section of beach front has 13 parcels varying in size up to 100+/- hectares with Lot 5 being the largest with the most frontage. Mechor Ocampo starts with Lot 1 at the town of El Golfo and continues toward Rocky Point about six miles. Lot 3 (the largest section) with about 40 hectares or 100+/- acres is presently for sale at $12.50 per square meter ($1.25+/- per square foot). The present owner has held the property for many years and now wants to sell. The property is near Lot 5 and is smaller, but with less beach frontage than Lot 5. This owner, along with his sister, owns Lot 10 in Mechor Ocampo and they have indicated that they have sold Lot 10 for $6.00 per square meter ($0.60+- per square foot). Lot 10 is smaller and has less frontage than Lot 5 and is generally level with limited views except at the front of the property. According to the seller, this lower price is due to the location of the property further from development, the Town of El Golfo, and the less desirable terrain. Lot 9 in Mechor Ocampo is also for sale for $12.37 per square meter ($1.24+/- per square foot). This lot is very similar in size and terrain to Lot 10 discussed above. The Company has acquired Lot 5 for $2.25 per square meter ($0.23+/- per square foot), or well below the asking and sold prices in Mechor Ocampo. El Golfo is an area that is just starting to develop and therefore there have been few sales of beachfront and beach view lots in the El Golfo area. One starting development on 14 hectares in Lot 3 of Mechor Ocampo has sold eight beachfront lots (total only 12) for $120,000 each without utilities or improvements. These have been sold to investors and potential users by private contact and without advertising. The asking prices for beach view lots in this subdivision range from $45,000 to $80,000, depending of the location. These lots are 50+/- feet by 100+/- feet. An overview of lot and land prices in Rocky Point is included in the Addenda. These prices dramatically point out the huge upside for land in El Golfo, compared to the more developed Rocky Point. But remember, El Golfo will be 45 minutes to one-hour closer to the United States/Mexico Border.

El Golfo/Rocky Point – General Economic and Area Information

The Colorado River forms the state line between Arizona, California, and Nevada, and continues southerly to the Sea of Cortez Along its entire length, it is a major recreation/boating area for Arizona, Nevada, and Southern California in the spring &

TRI_C007786

summer, and a perfect destination for "Snowbirds" in the winter creating a year around demand for the entire area.

Historically, neighboring Rocky Point has been a major recreational area for Phoenix and Tucson, Arizona. The drive time has been about three hours, making it a very easy weekend vacation spot. There have been many new high and mid-rise condominium units built near Rocky Point on Sandy Beach within the past few years, providing over 3,000 new units. These are well designed and constructed developments with many beach front amenities. These units generally have sold for $300,000 to over $1,500,000 and have been sold primarily to U.S. residents. El Golfo is about 25 miles north of Rocky Point by the shore line. However, historically there has been no connecting road. The new Coastal Highway will make the drive between El Golfo and Rocky Point less than 30 minutes and will make El Golfo closer to California, Western Arizona, and Nevada. This will dramatically change the access to the El Golfo area.

Development in El Golfo is coming and soon. Neighboring El Golfo developments include a proposed single-family development with a golf course fronting the beach neighboring the subject to the north. This proposed development is also planned to have a hotel near the beach and possibly a marina. The developer for this property is U.S.-based, and is reported to have both the financial and development capability to complete the project. El Golfo is a small, quiet community that is poised to undergo extensive real estate development with the completion of the Coastal Highway and the increased access to large U.S. markets that will then be within convenient driving distance. There are many resort areas of Mexico with extensive development taking place, however there are only limited areas on the water that have good **driving** access from the United States. The Coastal Highway will make the El Golfo/Rocky Point area even more accessible, with El Golfo being only one hour from the border at a new 16-lane crossing.

Short Term Business Goals

The Company will be dedicated solely to its purchase of Lot 5 of Mechor Ocampo and managing it for success. This includes the creation of a development plan, the development of marketing campaigns, and the pursuit of letters of intent for lot pre-sales.

As part of the short-term development plan, we will proceed to obtain an ALTA or equivalent land survey to proceed with a title insurance commitment, initial site studies, and engineering to plan for development and/or division of the property. In addition, we will proceed with the concession for the "Federal Zone" so that we may have exclusive use of the 20 meters controlled by the Mexican Government adjacent to the "high water mark." This is an important concession and we are proceeding forward. The other pre-development permit is for the ecology of the property and is an involved and extensive study. We have had the environmentalist we work with review Lot 5 on a preliminary basis and there are no apparent environmental concerns; however, the actual permit requires an expensive and time consuming study and approval process.

CONFIDENTIAL

TRI_C007787

Other permits pertain to the water, electricity, and planned development. These are in conjunction with the Municipality of San Luis (the governing entity) and the several department and utilities.

Within this initial permit period, we will be preparing preliminary site plans to determine the highest and best use/layout of the Lot 5 property and frontage. We will also explore the various sales materials we intend to use, such as property informational brochures and media packages for the development. This pre-marketing focus will concentrate on our primary target markets of Southern California, Arizona, and Nevada, with exposure in the rest of the United States and Canada as we proceed further.

To further ensure success, the Company will continue to focus on the development of strong relationships with key property professionals (brokers, financial institutions, law firms, building contractors and suppliers, etc.). While we presently enjoy a good relationship with several governmental agencies, we will also be working quite diligently throughout the whole development process to further strengthen and expand our relationships with governmental agencies and political entities. Since we also understand and respect the Mexican culture, we foresee no obstacle in achieving strong and favorable relationships with the governing authorities.

The Company will create and maintain an image and presence in the industry as an honest and creative enterprise, characterized by ethics, integrity, and producing a quality of work that represents a real value for clients and investors

Long Term Business Goals

Throughout 2007 and thereafter, the Company's only primary goal is continue to manage the planned development of Lot 5 for success. The primary focus will be the monitoring of all required permits and the development layout.

Thereafter, preliminary talks with several local contractors will commence so that the Company will be in a position to move quickly to choose contractors for such items as roadwork, water, electricity, etc. Also, discussions with building suppliers will be taking place to again ensure that the Company will be in a position to act swiftly as the need arises for any given material.

The marketing material will be formulated as the final vision of Lot 5 becomes evident. The Company foresees the actual sale of the parcels occurring early-year, 2008. It is the Company's intention to be positioned to start actual sales by the third quarter of 2008 to either the general public or to other builders.

The overall development of Lot 5 is for a planned "destination" mixed-use development. This will combine oceanfront and ocean view single-family lots and multi-family parcels with a commercial core including hotels, restaurants, recreation features, and support retail shops. The goal is to create a "Five Star" development that will appeal to users/buyers of all ages from the United States, Canada, Mexico, and anywhere else.

15.5 ACCEPTANCE OF SUBSCRIPTION AGREEMENT BY THE COMPANY

The Investor Suitability Requirements referred to in this section represent minimum requirements for potential Investors. Satisfaction of these standards does not necessarily mean that participation in this Offering constitutes a suitable investment for such a potential Investor or that the potential Investors' Subscription will be accepted by the Company. The Company may, in fact, modify such requirements as circumstances dictate. All Subscription Agreements submitted by potential Investors will be carefully reviewed by the Company to determine the suitability of the potential Investor in this Offering. The Company may, in its sole discretion, refuse a Subscription in this Offering to any potential Investor who does not meet the applicable Investor Suitability Requirements or who otherwise appears to be an unsuitable Investor in this Offering. The Company will not necessarily review or accept a Subscription Agreement in the sequential order in which it is received. The Company also has the discretion to maximize the number of Accredited Investors in this Offering and, as a result, may accept less than thirty-five (35) Non-accredited Investors in this Offering.

16. LITIGATION

The Company and its Principals have no lawsuits pending, no legal actions pending or judgments entered against the Company or its Principals and, to the best knowledge of the Company, no legal actions are contemplated against the Company and/or its Principals.

It is the intention of the Company that all potential Investors are given full access to such information for their consideration in determining whether to purchase the Notes being offered. Prospective Investors should contact the Company for access to information regarding the matters set forth or other information concerning the Company. Such recent amendments may not be circulated to Subscribers prior to the time of closing this Offering. However, potential Investors and their representatives may review such material or make inquiry of the Company concerning any of these and any other matters of interest.

18. FORECASTS OF FUTURE OPERATING RESULTS

TRI-CORE COMPANIES, LLC BUSINESS PLAN

Mission Statement

The mission of Tri-Core Companies, LLC (the Company) is to purchase virgin beachfront land on the Gulf of California (Sea of Cortez), Sonora, Mexico for either resale or for development.

The specific location the Company has concentrated on is between El Golfo de Santa Clara on the north and Puerto Peñasco (Rocky Point) on the south. This is a distance of about 80 miles and was chosen because of the access the new Coastal Highway has afforded this area. Prior to the new highway, this area was inaccessible except by rugged four-wheel-drive vehicles. The highway will make this area accessible by automobile for millions of visitors and buyers from the United States.

The Company believes that there will be a major increase in demand for property in this area with the completion of the highway. The highway is currently over three-quarters complete and only a 15-mile portion of the center section remains to be completed. This section is scheduled for completion by the end of Fall 2009.

Business Operations

Ownership and Employees:

The Company is intended to be a very competitive, highly motivated company with a small number of select key employees. The majority of the day to day responsibilities, planning and development tasks will be performed by the principal/managing partners. All other tasks that cannot be performed on behalf of the company by principals or employees will be done by hired contract services. An example of a hired contract service would be accounting.

Market Knowledge and the Property

Knowledge of the Marketplace:

The Principals of the Company have been active in real estate and Mexico for several years and consider the El Golfo/Rocky Point market one of the (if not the most) active markets in all of Mexico for development and potential upside investment.

The El Golfo area was chosen for the Company's purchases due to its potential appreciation. Some of the driving factors that influenced this decision were:

- The new Coastal Highway;
- Its close proximity to the United States markets (one hour drive from the Border of US/Mexico);
- Its location on a beautiful, pristine, major body of water;
- The quality of the sand beaches ;
- The scenic mountain views of the Baja Peninsula;
- The opening of the area by the construction of the Coastal Highway from the US/Mexico border 300 miles to the south along the coast of the Sea of Cortez to Guaymas, Mexico, a major seaport;
- The $50 million dollar international airport under construction at Rocky Point that will accommodate all types of passenger planes. The first runway is completed and the balance is to be completed by early 2010.

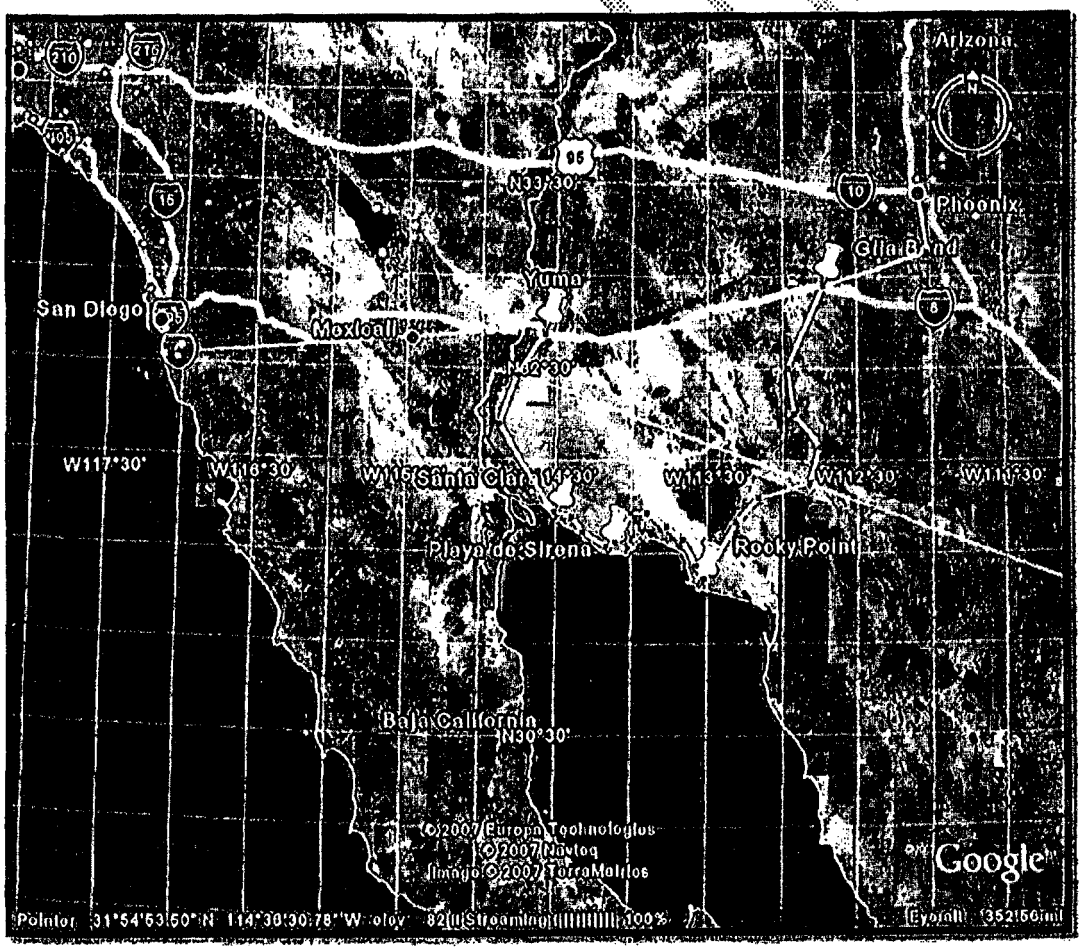
CONFIDENTIAL

- Two state-of-the-art hospitals, Hospital of Peñasco and the IMMS Hospital, are currently under construction and will serve the El Golfo/Rocky Point areas.

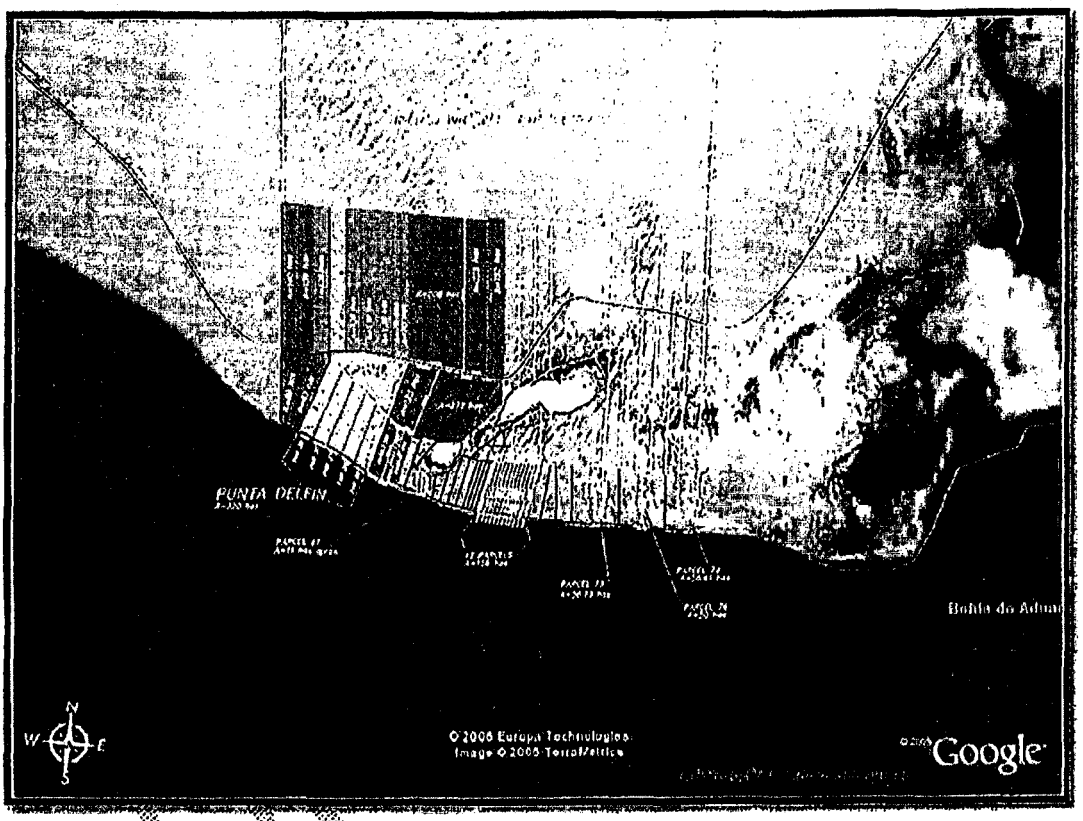
The Mexican and Sonoran Governments are dedicated to promoting the area as a major destination for both Americans and Canadians. This is evidenced by the millions of dollars of infrastructure being put in place by the United States and Mexican Governments. A prime example of this dedication is the Coastal Highway. This three hundred mile highway is being built at a cost in excess of $200 million dollars and will connect the port city of Guaymas in Mexico with the US/Mexico border at San Luis Rio Colorado, south of Yuma, Arizona. This will make this whole area much more accessible for millions of Americans in Southern California, Arizona, and Nevada for weekends and vacations, as well as for longer stays by visitors from all across the United States and Canada.

The Property

Parcel 47 – Relaxante is at the southeastern edge of the town of El Golfo on the Sea of Cortez. It is approximately one hour drive time south of the U.S. /Mexico border at San Luis.



This parcel has approximately 26.75 acres of land with over 640 feet of beautiful sandy beach frontage. There are rolling dunes and wonderful views of the Sea of Cortez and the mountains of the Baja Peninsula. The site is well-adapted for the launching of small boats.



The Proposed Development for Lot 47:

This project is a proposed gated luxury development fronting on and viewing the Sea of Cortez in the rapidly developing area of San Luis Rio Colorado, Sonora, Mexico. The property consists of 10.83+/- hectares (26.8+/- acres) of land on a site overlooking the scenic waterways of the Sea of Cortez and the mountains of the Baja Peninsula to the west. The property has over 200 meters (640+/- feet) of sandy beach frontage. There are beautiful scenic views up and down the sandy beaches of the Sea of Cortez (a.k.a. the Gulf of California).

This project is a proposed mixed-use development, including a gated single-family development of 40+/- villa lots, a 140-unit condominium development, and some commercial facilities.

Due to topography, the northerly portion of the site contains a mid-rise condominium building. The center portion of the site is gently sloping and will contain the staggered water view lots. The southern beachfront portion of the site contains six beachfront lots, along with a beachfront pool and beach club. Due to the carefully chosen staggered lot placement, all villas and condominium units will enjoy beautiful views of the Sea of Cortez and the mountains of the Baja Peninsula.

Villa lots will be approximately 6,500 square feet in size and the Villas will range in size from 2,400 to 2,600 square feet. The condominium units will be approximately 1,500 square feet with larger units located on the top floors. The six prime waterfront lots will be on the beach – affording wonderful views for miles in each direction and easy water and beach access. The development will provide all the amenities associated with a destination development.

Business Goals

In early 2008, we will be contracting for the necessary survey, topographical map, and environmental studies required for the permitting stage. In addition, we will proceed with the concession for the "Federal Zone" so that we may have exclusive use of the 20 meters adjacent to the "high water mark" that is currently controlled by the Mexican Government. This is an important concession and we are proceeding forward.

After preliminary discussions with utility suppliers, it is the Company's belief that the use of self-contained utilities are in the best interest of the development. Permits for these utilities will be sought from the municipality of San Luis (the governing entity), in conjunction with our partners.

During the early part of 2008, the Company's primary focus will be on the preparation of the site plan, all required studies, and the gathering of bids for utilities. It is anticipated that by mid-2008, we will be finalizing the preliminary plans in accordance with site reports.

Once the final layout has been concluded, talks with local developers, investors, and realtors in Mexico and the United States will commence. It is the intention that the Company will be in a position to move quickly and efficiently to either sell individual lots or sell the development. The Company foresees the actual sale of the parcels occurring in mid-year 2009.

To ensure further success, the Company will continue to focus on the development of strong relationships with key property professionals (realtors, agents, financial institutions, law firms, building contractors and suppliers, etc.). While we presently enjoy a good working relationship with several governmental agencies, we will also be working quite diligently throughout the entire developmental process to further strengthen and expand our relationships with governmental agencies and political entities. Since we also understand and respect the Mexican culture, we foresee no obstacle in achieving a strong and favorable relationship with the governing authorities.

El Golfo / Rocky Point – General Economic and Area Information:

The Colorado River forms the state line between Arizona, California, and Nevada, and continues southerly to the Sea of Cortez. Along its entire length, it is a major recreation / boating area for Arizona, Nevada, and Southern California in the spring and summer, as well as a perfect destination for "Snowbirds" in the winter – creating a year-round demand for the entire area.

Historically, neighboring Rocky Point has been a major recreational area for Phoenix and Tucson, Arizona. The drive time to Rocky Point has been about four-plus hours from Phoenix, making it a very easy weekend vacation spot. There have been many new high and mid-rise condominium units built in the Sandy Beach neighborhood of Rocky Point within the past few years. These are well-designed and constructed developments with many beachfront amenities. These units have generally sold for $300,000 to over $1,500,000, primarily to U.S. residents.

El Golfo is about 25 miles east of Rocky Point. The El Golfo area is near the northern end of the Sea of Cortez and is well protected from adverse weather. Consequently, the waters are generally calm. El Golfo is a picturesque fishing village with long, wide, sandy beaches. The fishermen launch their boats from the sandy beaches directly to the water. There is at present one paved road that ends at El Golfo.

The new Coastal Highway will make the drive between El Golfo and Rocky Point less than 30 minutes. Accordingly, this whole area between Rocky Point and El Golfo is poised to undergo extensive real estate development. In anticipation of this future growth, a new major border crossing facility is planned for San Luis to help relieve congestion at the present in-town facility. The number of inspection lanes will increase from five to sixteen, and will consequently decrease the time for crossing the border.

For the first time, large U.S. markets from California, Nevada, and Western Arizona will be within a reasonable driving distance. As an example, the Southern California market will have its driving time reduced from approximately eight hours to just around four hours. There are many resort areas of Mexico with extensive development taking place, however, there are only limited areas on the calm waters of the Sea of Cortez that have good driving access from the United States.

The new highway is the driving force that has dramatically changed access to this area. It is the Company's belief that since prime oceanfront land in this area's acreage is limited, the demand for this property will be strong. This belief is further strengthened by its aggressive promotion of Relaxante to the new markets of California, Nevada, and Western Arizona.

(http://defrente.puerto-penasco.com/editions/452/003.html)

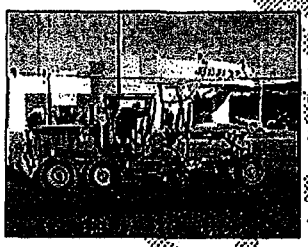
Press Bulletin
Issue #452

With a projected investment of 400 million pesos (~$36.8M USD) the Director of Public Works is planning to continue during 2008 the integral project of city paving and electrification and water supply to the new neighborhoods - as well as enlarge the city's drainage network to improve the city's image.

Marco David Rangel Lopez, director of the afore mentioned office, said that it cannot be doubted that among the priorities of Mayor Heriberto Renteria Sanchez is the unprecedented Paving Works Project, for which he is obtaining a package of Federal Government resources around 100 million pesos (~$9.2M USD).

Rangel Lopez said that they want to continue with the pavement work on another 20 avenues and boulevards, covering a surface of more than 700 thousand square meters, in addition to the package of streets repaired during this past year. If this project is accomplished in full, the percentage of paved streets in our city will rise from 18% to 40%.

Moreover within the projects for 2008, the Director of Public Works mentioned that they will include the installation of the drainage network for the northwest sector of the city with and investment close to 60 million pesos (~$5.5M USD).



At the same time they will work on the construction and maintenance of sidewalks at the main boulevards and avenues, not forgetting the purpose of improving the image of the old harbor sector where financial resources are designated for around 90 million pesos of improvements (~$8.3M USD) according with the executive plan approved by the city council.

To continue with the electrification in the New Peñasco and San Rafael neighborhoods, it is an investment of at least 15 million pesos (~$1.38M USD) is designated for 2008, and it is also planned to attend to the delayed work on the water supply and they will also program to provide basic services.

He added that among the plans and projects for this year are actions for benefit of schools with the construction of classrooms, fences, tile roofs and to attend several requests channeled through the Sonorense Program of Social Participation (PASOS) and the Direction of Social Development.

He also added that currently they have a work plan with more than 200 projects of pavement works, urban improvement, basic services, schools and religious centers, that will be accomplished according with the flow of the municipal resources as well as with the resources assigned from the state and federal governments - and in some cases with assistance from credit entities.

CANACO Reports A Good 2007, Optimistic Forecast For 2008

Border Governor's Conference, Tourism, Development All Bode Well For Peñasco In 2008, Says CANACO

(http://defrente.puerto-penasco.com/editions/451/002.html)

By Ivan Bravo Lopez
Issue #451

Even though the last month of the year suffered a significant decrease in many commercial areas, CANACO (Camara Nacional de Comercio de la Ciudad de Mexico - Mexico's System of Local Chambers of Commerce and Development) managed to close out a good year according to its director Arturo Rodriguez Rico. CANACO met their goals and more, as evidenced by the meeting of the border state governors, which was seen as a huge success.

Arturo Rodriguez Rico, President of the National Chamber of Commerce (CANACO) said that despite the economic recession suffered by the US, many associates of CANACO with business interests are closing out the year very well. That is due the fact that December is the month with the biggest increase in sales.

"It was a positive year for the growth and development of the economy of Puerto Peñasco; we were the hosts of the most important event in the history of this port, the meeting of the border state governors. It was a huge success and received publicity worldwide, publicity that would have cost the Chamber of Commerce millions of pesos but was completely free. Its results will hopefully be noticeable in 2008 and 2009," he said.

The president of CANACO said that many State Programs came to Puerto Peñasco and accomplished important improvements. Authorities from SEDESOL (Mexico's Secretariat of Social Development) and PASOS have constantly visited our port to support and encourage the associated merchants of CANACO.

"Guatimoc Iberri Gonzalez and 'Chito' Celaya have repeatedly visited us and they have brought important projects to Puerto Peñasco that are already underway, which shows that the State Authorities care about those who live and own businesses here," he said.

"There are many projects in Puerto Peñasco that were already in place as well as new ones. Although some have not yet started, we are taking full advantage of those already here which will help the chance of further improvements next year," said Arturo Rodriguez Rico.

He also pointed out that cross-border traffic is expected to only will rise in the upcoming years and that that will bring other economic benefits, as the economic structure in the port depends mostly on tourism.

"Puerto Peñasco depends on tourism, and with the opening of the new international airport and with the improvements at the border crossings, CANACO is expecting an economic boom to take place. In past years and in 2007 we expected tourism mainly from Arizona. But with the new infrastructure next year we expect tourists from California and Colorado, as well as people that will come by air on new commercial flights. So we are expecting a sudden increase to the economy since Puerto Peñasco is an excellent destination," said the president of CANACO.

He also added that due to the stop of the developers, the last months of the year were economically weak, but that the economy typically comes back to normality beginning with the first trimester of the year. A few U.S. holidays are coming up that brings surges of tourists who prefer to come to Puerto Peñasco for their vacations. He also commented that the 'snowbirds' – the seasonal visitors from outside the Southwest regions – are starting to arrive to this port early this year, and with them the associates of CANACO will benefit.

To finalize, Arturo Rodriguez Rico said that there are more than 300 members associated with CANACO, and that next year they will look for more members to join the Chamber to help strengthen and create newer and better programs.

Peñasco Maintains Strong Flow Of Tourism

Real Estate Crisis Believed to Have Already Hit Bottom

(http://www.visitrockypoint.com/?p=2900)

Despite the undeniable negative effects of the economic downturn in the United States, Which has already hit bottom, throughout 2007 Puerto Peñasco maintained a high rate of tourism and sustains a clear upward tendency, revealed Epifanio Salido Pavlovich, head of the Sonora Commission on the Promotion of Tourism.

Salido Pavlovich detailed that by the end of the year, foreign tourism had increased by nearly 11%, topping out at 1,700,000 visitors, 80% of these from Arizona. Likewise, national tourism increased by 14% totaling more than 400,000 visitors. Therefore, reports for 2007 registered a grand total of 2.1 million tourists to the area.

The tourism official remarked that although there remain many challenges to address, the city's potential continues to be positive and the area is still the star destination in Sonora. He added that the state and municipal governments are jointly working on efforts to focus on areas that are lacking.

Salido Pavlovich stated that in 2008 they will have to generate concrete solutions in the areas of housing, potable water and others of basic infrastructures brought on by the same "boom" in tourism.

He stated that the 2007 economic downturn and real estate crisis in the United States had a strong impact on Peñasco. However, he stated, this is something that has already hit bottom and now phase of recuperation can be expected.

He believes that by mid-2008 the economic crisis will have passed, and added that till now this has not caused the withdrawal of investments from the port.

The coordinator for the Sonora Commission on the Promotion of Tourism remarked that, despite everything, the annual average for Puerto Peñasco has been favorable. He added that though there was a slowdown in investment, the flow of tourism did not drop; to the contrary, this remained at high levels.

He reiterated that the crisis has already hit bottom and period of recuperation has begun. He expects that this will positively impact the city as the shining northwestern part of the country in the area of tourism.

Mission Statement
The mission of Tri-Core Companies LLC (the Company) is to purchase virgin beachfront land on the Gulf of California (Sea of Cortez), Sonora, Mexico for either resale or for development.

The specific location the Company has concentrated on is between El Golfo de Santa Clara on the north and Puerto Peñasco (*Rocky Point*) *on the south*. This is a distance of about 80 miles and was chosen because of the access the new Coastal Highway has afforded this area. Prior to the new highway, this area was inaccessible except by rugged four-wheel-drive vehicles. The highway now makes this area accessible by automobile for millions of visitors and buyers from the United States.

The Company believes that there will be a major increase in demand for property in this area with the completion of the new coastal highway.

Business Operations
Ownership and Employees:
The Company is intended to be a very competitive, highly motivated company with a small number of select key employees. The majority of the day to day responsibilities, planning and development tasks will be performed by the principal/managing partners. All other tasks that cannot be performed on behalf of the company by principals or employees will be done by hired contract services. An example of a hired contract service would be accounting.

Market Knowledge and the Property Knowledge of the Marketplace:
The Principals of the Company have been active in real estate and Mexico for several years and consider the El Golfo/Rocky Point market one of the (if not the most) active markets in all of Mexico for development and potential upside investment.

The El Golfo/Rocky Point area was chosen for the Company's purchases due to its potential appreciation. Some of the driving factors that influenced this decision were:

- Its close proximity to the United States markets (one hour drive from the Border of US/Mexico)
- Its location on a beautiful, pristine, major body of water
- The quality of the sand beaches
- The scenic mountain views of the Baja Peninsula
- The opening of the area by new Coastal Highway from the US/Mexico border 300 miles to the south along the coast of the Sea of Cortez to Guaymas, Mexico, a major seaport

TRI_C 002047

- The new $50 million dollar international airport at Rocky Point accommodates all types of passenger planes
- The newly constructed Hospital of Peñasco will serve the El Golfo/Rocky Point areas
- The newly designated cruise ship port in Rocky Point

The Mexican and Sonoran Governments are dedicated to promoting the area as a major destination for both Americans and Canadians. This is evidenced by the millions of dollars of infrastructure being put in place by the United States and Mexican Governments. A prime example of this dedication is the Coastal Highway. This three hundred mile highway is being built and will connect the port city of Guaymas in Mexico with the US/Mexico border at San Luis Rio Colorado, south of Yuma, Arizona. This will make the whole area much more accessible for millions of Americans in Southern California, Arizona, and Nevada for weekends and vacations, as well as for longer stays by visitors from all across the United States and Canada.

TRI-CORE COMPANIES LLC
BUSINESS PLAN

Mission Statement
The mission of Tri-Core Companies LLC (the Company) is to purchase virgin beachfront land on the Gulf of California (Sea of Cortez), Sonora, Mexico for either resale or for development.

The specific location the Company has concentrated on is between El Golfo de Santa Clara on the north and Puerto Peñasco (Rocky Point) on the south. This is a distance of about 80 miles and was chosen because of the access the new Coastal Highway has afforded this area. Prior to the new highway, this area was inaccessible except by rugged four-wheel-drive vehicles. The highway now makes this area accessible by automobile for millions of visitors and buyers from the United States.

The Company believes that there will be a major increase in demand for property in this area with the completion of the new coastal highway.

Business Operations
Ownership and Employees:
The Company is intended to be a very competitive, highly motivated company with a small number of select key employees. The majority of the day to day responsibilities, planning and development tasks will be performed by the principal/managing partners. Market Knowledge and the Property
Knowledge of the Marketplace:
The Principals of the Company have been active in real estate and Mexico for several years and consider the El Golfo/Rocky Point market one of the (if not the most) active markets in all of Mexico for development and potential upside investment.

The El Golfo area was chosen for the Company's purchases due to its potential appreciation. Some of the driving factors that influenced this decision were:

- Its close proximity to the United States markets (one hour drive from the Border of US/Mexico)
- Its location on a beautiful, pristine, major body of water
- The quality of the sand beaches

TRI_C007456

- The scenic mountain views of the Baja Peninsula
- The opening of the area by the new Coastal Highway from the US/Mexico border 300 miles to the south along the coast of the Sea of Cortez to Guaymas, Mexico, a major seaport;
- The new $50 million dollar international airport at Rocky Point accommodates all types of passenger planes
- Two state-of-the-art hospitals, Hospital of Peñasco and the IMMS Hospital, are currently under construction and will serve the El Golfo/Rocky Point areas
- The newly designated cruise ship port in Rocky Point

The Mexican and Sonoran Governments are dedicated to promoting the area as a major destination for both Americans and Canadians. This is evidenced by the millions of dollars of infrastructure being put in place by the United States and Mexican Governments. A prime example of this dedication is the Coastal Highway. This three hundred mile highway is being built and will connect the port city of Guaymas in Mexico with the US/Mexico border at San Luis Rio Colorado, south of Yuma, Arizona. This will make the whole area much more accessible for millions of Americans in Southern California, Arizona, and Nevada for weekends and vacations, as well as for longer stays by visitors from all across the United States and Canada.

These units have generally sold for $300,000 to over $1,500,000, primarily to U.S. residents.

El Golfo is about 25 miles east of Rocky Point. The El Golfo area is near the northern end of the Sea of Cortez and is well protected from adverse weather. Consequently, the waters are generally calm. El Golfo is a picturesque fishing village with long, wide, sandy beaches. The fishermen launch their boats from the sandy beaches directly to the water. There is at present one paved road that ends at El Golfo.

The new Coastal Highway makes the drive between El Golfo and Rocky Point approximately 30 minutes. Accordingly, this whole area between Rocky Point and El Golfo is poised to undergo extensive real estate development. In anticipation of this future growth, a new major border crossing facility is planned for San Luis to help relieve congestion at the present in-town facility. The number of inspection lanes will increase from five to sixteen, and will consequently decrease the time for crossing the border.

For the first time, large U.S. markets from California, Nevada, and Western Arizona will be within a reasonable driving distance. As an example, the Southern California market will have its driving time reduced from approximately eight hours to just around four hours. There are many resort areas of Mexico with extensive development taking place, however, there are only limited areas on the calm waters of the Sea of Cortez that have good driving access from the United States.

The new highway is the driving force that has dramatically changed access to this area. It is the Company's belief that since prime oceanfront land in this area's acreage is limited, the demand for this property will be strong. This belief is further strengthened by its aggressive promotion of Relaxante to the new markets of California, Nevada, and Western Arizona.

Socially Responsible Investing

Arizona Investment Center is investing in YOU.

We are always looking for innovative opportunities that are not necessarily tied to the current economic environment that also help build a sustainable and equitable economy. With Arizona Investment Center, investors have the chance to build a greener, eco-friendly world, while earning above average returns due to our investment strategy, which looks to maximize your return while being socially-conscious.

Socially responsible investing is **a $3 trillion market**, broad based approach to investing, also recognized as green investing, sustainable investing, and ethical investing. Green investment options are always being explored by Arizona Investment Center.

ERC (Environmentally Responsible Company) - MRF (Material Recovery Facilities)

One example of a social investment partner that Arizona Investment Center has worked closely with is ERC, which is operating and expanding current MRFs. MRFs have the capability to turn over 99% of all trash in to a recycled, reusable product, significantly reducing landfill usage. In conjunction with MRF, there is always the commodities market, more specifically the pellets market, which is agricultural trash that being turned into a renewable, usable resource used for energy. With years of experience working with ERC (Environmentally Responsible Company) in the recycling industry, we are excited to share with investors' new ways to "invest in you."

- *REO Pools - Allowing investors to passively participate in real estate investments at a lower buy-in.*
- Asset Backed Investment - Investments are secured by the properties purchased by the pool.
- Priority Payout - Investor's returns have first priority of payment.
- Security Title - The funds during the investment term are held in escrow by the agent, Security Title, a well known title company. The escrow account was specially created for our investors to keep their monies safe and secure.

Information

The company has launched a Flagship Operation in Las Vegas, Nevada with the first, true Closed Loop process that focuses on the goal of keeping "all" Municipal Solid Waste (MSW) out of landfills.

Leading industry competitors own and operate landfills, which provide a significant source of revenue and are thus biased toward maintaining (and growing) landfill revenues while publically promoting waste-to-landfill reduction. Our company does not have such double standard biases.

To our knowledge, no other company operates a true Closed Loop waste recycling and processing facility where "all" waste is converted to products for sale in commodity or retail markets. This includes back-end biomass and biofuel renewable energy services, which convert organic wastes to bio pellets in the secondary processing operation and organic and inorganic wastes (e.g. glass, leather, rubber, and textiles) into energy in our waste to energy gasification process for sale to energy and utility companies.

The company brings the many years of front-end waste collection, transfer, material recovery, recycling, and remnant product manufacturing services into the mix, thus closing the loop on MSW.

Preventing the waste from entering landfills is a key initiative both nationally and in Nevada.

Thank you for your interest in ERC, a proud partner of the Arizona Investment Center.

Information

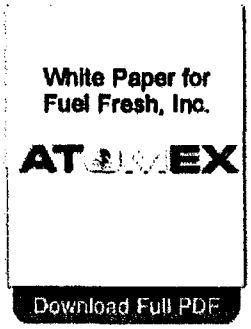
Fuel Fresh Inc., is a fuel additive manufacturer based in Phoenix, Arizona providing the marketplace with unique products of the highest quality since 1989. Current clients include the largest engine manufacturer in the world, Briggs & Stratton Corporation of Milwaukee, Wisconsin. Fuel Fresh has remained their single supplier for high performance fuel additives for over 20 years.

"Atomex," fuel additive is a spinoff from Fuel Fresh research and development program, a work in progress for over 10 years. "Atomex," is the only fuel additive made which causes water vapor to form in the combustion chamber, which provides the following additional benefits:

- Lower exhaust emissions
- NOx, CO, HC, PM
- Maintain octane level of gasoline.
- Keeps fuel refinery fresh for about a year.
- Greater engine operating efficiency.
- Decarbonizes and cleans the combustion chamber.
- Cleans and maintains injectors, jets, valves.
- Inhibits fuel system corrosion.
- A cost effective approach to cleaner air.

By placing "Atomex," into the fuel supply at a minimal cost, a large net reduction of atmospheric pollutants can be realized in a relatively short period of time.

When this fuel additive is blended at the refinery or terminal level, the small increase in price per liter/gallon at the pump, will be offset by higher engine efficiency. The motoring public will appreciate the noticeably better operating vehicles, less maintenance costs, as well as less pollution.



We are happy to provide a PDF copy of the Fuel Fresh Inc. White Paper for Atomex, however, due to the sensitive material enclosed the file is password protected.

Information

Mexico has been a very rewarding area of investment for our investors. Although many areas of this country offer good opportunity, the one where we have concentrated our efforts over the last 10 years has been the North and Eastern shores of the Sea of Cortez in the state of Sonora.

Mexico's largest component of their GDP is oil. Next is tourism. The state of Sonora is one of the most proactive states in Mexico in promoting tourism. The Mexican government is currently building a 350-mile long coastal highway from the town of El Golfo de Santa Clara (on the Northwest coast) all the way to the city of Guaymas on the eastern coast of the Sea of Cortez.

This highway is allowing access to several thousand acres of prime beachfront property that previously had no road access at all. By purchasing beachfront parcels 2-3 years ahead of the highway progress, we are able to take advantage of normal appreciation plus the large property value increase that access provides.

Attractive Improvements include:

- Infrastructure improvements to the largest town along this highway, Puerto Peñasco (aka Rocky Point)
- New international airport near Rocky Point
- New cruise ship origination terminal near Rocky Point, scheduled to open in late 2012
- Proximity to U.S., only 1 hour South of the border and approximately a 4 hour drive from AZ & CA
- Nearest truly virgin beaches to the U.S. mainland

About Financially Free Seminars

Do you ever wonder what happens to all your money or why you can't get along with what you make? If you do, you are like most Americans who live from paycheck to paycheck without stopping to think about their future. Bob Blayter founded the Financially Free Seminars to help people understand and apply sound principles for managing their money.

This is what we do

This step-by-step workshop is designed to show participants the necessary steps to set up a budget that works. All you need to know is how to add or subtract.

You will learn:

MOGLER-000480

1. To track your expenses in a fast, easy manner.
2. To eliminate debt without consolidating or getting any extra money.
3. To cut your expenses, without changing your standard of living.
4. To set up a real budget before you leave!

Host a Seminar

Bob Blayter is available to come to your church or place of business to do a seminar for your congregation or employees.

Radio Show: The Money Team
