Enclosed is a letter because I and several neighbors have experienced adverse health effects since the installation of smart meters in our neighborhood. our houses are older and not strongly built as houses in Phoenix are, so perhaps this is why.

In addition, a neighbor's fuses all blew after installation of smart meter which was installed despite her opting out.

In addition several transformers blew out after installation of smart meters, on my block. they were working fine before this

APS should not be allowed to charge people for opting out, as smart meters are ~~making~~ making people ill.

Please have commissioners read the [illegible]

from Sherry Ratner
