ORIGINAL

Dear members of the Arizona Corporation Commission:

I believe energy efficiency is very important because it saves money on utilities during the blistering summer heat, and helps to decrease emissions, which lessens respitory illnesses that are prevalent in Arizona. As a citizen of Arizona, I am in support of the current energy efficiency standard, and I believe it should stay in effect to keep these benefits of energy efficiency around.

I recognize that energy efficiency costs slightly more money up front, but I agree to this cost to see my utility bills decrease overtime.

The current energy efficiency standard is key! Thank you.
