Docket E-00000XX-13-0214

0000157918

s of the Arizona Corporation Commission

efficiency is important and vital to our state. It allows for citizens to save money on utilities as well as decrease the need for consumption.

While the cost may be higher in the beginning, the long term savings and positive impact will more than make up for this start up cost. As a citizen I believe it would be most beneficial to the state and citizens alike to uphold the current energy efficiency standard.
