Docket E-00000XX-13-0214

Dear members of the arizona Corp

0000157923

I believe energy efficiency is very important because it saves money on utilities during the summer heat and helps ~~to decide~~ decrease which augment respiratory illness that are prevalent in AZ. As a resident of the state of ariz this state, I am a support of the current energy efficiency standard. I Believe I should stay in effect to keep the benefits of energy efficiency.

I realize that energy efficiency costs slightly more up front, but I agree to pay this ~~cast~~ to see my utility bills decrease over time. The current energy efficiency policy is key! Thank you for this urgent issue.
