Docket E-00000XX-13-0214

0000157924

Dear members of the Arizona corporat

The importance of energy efficiency is huge. Living in Phoenix, Arizona, I am well aware of the summer heat. With more efficient energy sources, utility bills would ultimately decrease. Toxic emissions would also be reduced. Although costs may be slightly higher up front, the issue is urgent. Over time, bills would indeed decrease.

Sincerely,

Lauren Polson
