Docket E-00000XX-13-0214

0000157951

of the Arizona Corporation Commission:

Our earth's resources are very important to me especially as a student living in Arizona. I support the energy efficiency standard because I believe that it will benefit everyone by saving us money and resources in the long-term.

I am more than willing to pay a slightly higher up front cost in order to see my utility bill decrease over time. Thank you for working on this important issue!

Sincerely,

Alison Steffel
