Docket E-00000XX-13-0214

0000157954

ers of the Arizona Corporation Commission

I believe that energy efficiency is very important because it saves money, especially during the summer where the heat is to much to handle. Especially with families that can barely afford to pay the bills. when they see that their bill is way up. they have to scrape up the money just to keep light and air on.

It also helps decrease emissions which causes respiratory illnesses, especialy in children and elderly.

It would mean alot to us to keep the current energy the same. Thank you for your work on this urgent issue.

Sincerely,

LuTasha Lassiter-Baines
