AZ CORP COMMISSION
DOCKET CONTROL

Dear Members of the Arizona Corporation Commission:

As a citizen of Arizona, I have experienced pollution, high summer utility bills, and a struggling economy. I believe that energy efficiency is the answer to some of Arizona's most pressing problems. I also believe that the energy efficiency standard that is in place currently needs to be supported if we are ever to find a solution to these problems.

ORIGINAL

I am aware that energy efficiency costs slightly more upfront, and I will agree to paying that so that I may bee my energy bills decrease and see my state find solutions. Thank you!

Sincerely,

Weston Barker
