Subject: Docket No E-00000XX-13-0214 Please Oppose Rescinding the Energy Efficiency Standard

Dear Chairman Stump and Commissioners:

ORIGINAL

I am writing as a long-time Arizona resident and a big fan of the Energy Efficiency Standard. Because of the Standard and the workshops on energy efficiency which Tucson Electric Power sponsored, I learned several ways to save energy in our home and club house.

After attending one of the workshops, I was motivated to change my light bulbs to CFLs and research upgrading our windows. When I saw the energy we saved, we decided to have photovoltaics installed - but under the TEP rebate program, it could only be at 90% of our energy use. Still, my husband and I were relieved to avoid adding to greenhouse gases, no matter how modestly.

An interesting result occured once the PV was installed. We became intense energy monitors and as a result, I replaced my energy hog desktop computer with a laptop and our 2000 model home thermostat with a programmable thermostat. Our 14 Photovoltaic panels now produce all that we need and even excess. Thank you Energy Efficiency Standards and the foresight of the 2010 Arizona Corporation Commission

Sincerely,

Donna Branch-Kelby
