AZ CORP COMMISSION
DOCKET CONTROL

Barbara H. Warren, MD, MPH

April 5, 2015

Dear Commissioner Bitterswith,

I am a Tucson Electric Power (TEP) customer and a solar electric power provider to TEP. Net metering is the backbone of Tucson's solar economy, allowing rooftop solar customers to use electricity at a one to one ratio with what our solar panels produce. T.E.P. has filed a proposal to the ACC to end net metering and substitute it with an unfair scheme to credit rooftop solar producers of free energy to them for half of the energy produced. This is unfair and outside of the standards of the A.C.C.

I ask you to at least tell TEP that their proposal should only be heard during a regular rate case, according to ACC policies. And then fairness be carefully considered. Thank you

Barbara Henderson

Dear Commissioner Stump,

I am a Tucson Electric Power (TEP) customer and a rooftop solar electric provider to T.E.P. Net metering is the backbone of Tucson's solar economy, allowing rooftop solar customers to use electricity at a one-to-one ratio of what our solar panels produce. T.E.P. has filed a proposal to the A.C.C. to end net metering and substitute it with an unfair scheme to credit rooftop solar producers of free energy to them for only half of the energy they produce. This is unfair and outside of the standards of the A.C.C.

I ask you to at least tell T.E.P. that their proposal should only be heard during a regular rate case — and then consider fair solutions to customers according to ACC policies. Thank you
