Dear Commissioner Little,

Tucson Electric Power's rooftop solar proposal should be heard during a regular rate case now! All factors should be considered - especially those of working class families who have invested in clean energy, not only because its affordable, but sustainable. Keeping families afford utilities and promote healthy communities should not suffer by corporate greed.

Be fair! Hear all sides!

Many thanks,

Martha Martin

June 9, 2015

Dear Commissioner Forese,

Tucson Electric Power's rooftop proposal should be heard during a regular rate case now! Hear all factors affecting this proposal to end net metering.

Currently middle class and working class customers receive a one-to-one ratio of what their solar panels produce. Hard working families who invested in clean, affordable energy should be heard before TEP rips apart their promise as defined by current rate agreements. Before TEP may cut these credits by more than half - please find out why & determine what's fair. Thank you!

DOCKET E-01933A-15-100

June 9, 2015

Dear Commissioner Burns,

Make no exception for TEP! Please require TEP to submit their rooftop solar proposal to a rate case hearing when all factors may be considered.

Ending net metering will price middle class and working class families out of solar energy. They want clean energy. They want affordable utilities. They want to enjoy a healthy, sustainable environment. Honor their good faith investment in rooftop solar with a Rate Case hearing for all views to be explored. Thank you!

June 9, 2015

Dear Commissioner Stump,

Please wait to decide TEP's proposal to end net metering for solar customers until a rate case hearing can be held. So all factors may be considered.

Please be fair and grant no exceptions to TEP. Current rooftop solar customers earned the credits for the energy they've collected based on a good faith agreement with TEP.

Thank you,

Martha Martin

DOCKET E-01933A-15-0100

June 9, 2015

Dear Commissioner Smith,

Please wait to decide TEP's proposal to end net metering for solar customers until a rate case is filed and all factors shall be considered. Making an exception for the powerful TEP will destroy ordinary citizen incentive to maintain rooftop solar systems and will discourage potential new solar customers to use this valuable source of clean energy.

Be fair. No exceptions. Direct TEP to be heard with others during a regular rate case hearing.

Thank you! Martha Martin
