To Whom It May Concern,

I am a TEP customer who is very concerned about the effects of energy production on the environment. I urge you to divest for the San Juan Generating Station, which is an antiquated, highly polluting facility, inefficient system, which not only damages the environment, but puts your ratepayers at risk. Why continue to invest in this dinosaur?

I also urge you to stop attacking household solar, but rather to invest further in renewable sources. Working with solar customers to supplement the grid makes sense for a forward-looking company.

Please do the right thing!

Sincerely,

Phyllis A. Petersen
