CORPORATE INFORMATION

Question A-8

1. Applicant is a Limited Liability Company registered in the state of Nevada. A recent copy of Applicant's Certificate of Good Standing from the Nevada Secretary of State is attached. Applicant submitted an Application for Registration of a Foreign Limited Liability Company on February 10, 2004. As of yet, Applicant has not received the certificate of approval. It will be filed with the Commission in this docket as soon as it is received.
2. Applicant is a Limited Liability Company managed by one of its members, David S. Clark who also serves as Applicant's President. There is a "CommPartners' family" structured as follows:

There are two LLC member managers of CommPartners HoldCo named CommPartners, LLC (the Applicant, EIN 20-0564676) and CommPartners Network Services (EIN 20-0564616).

Essentially, the overall effort is for the Applicant, CommPartners, LLC (CPLLC) to be the regulated competitive local exchange carrier. CPLLC will establish the network's points of presence (POPs) in Illinois, New York, Georgia, Texas, and Nevada and interconnect with the incumbent carriers to purchase trunks from these POPs to CPLLC's wholesale customers. These wholesale customers will include: Internet service providers, cable companies, fiber to the home overbuilders, and municipal entities. CommPartners Network Services (CPNS) will provide unregulated services to these customers such as Internet services, billing services, provisioning, and other back office functions. Between the combination of CPLLC's regulated services and CPNS' unregulated functions, the CommPartners' "family" will be able to provide a turn-key product to wholesale customers. In turn, these wholesale customers will sell the product to their end user subscribers.

3.2.8.4 Call Trace

Call Trace allows the Customer to dial a code to automatically request that the Utility record a caller's originating telephone number and the date and time of the call as well as the date and time of the Customer initiated trace. The information is stored by the Utility and disclosed only to a law enforcement agency for investigation purposes. The customer does not receive any information regarding the origination of the calls.

3.2.8.5 Call Waiting

Call Waiting permits the customer engaged in a call to receive a tone signal indicating a second call is waiting; and, by operation of the switchhook, to place the first call on hold and answer the waiting call. The Customer may alternate between the two calls by operation of the switchhook, but a three-way conference cannot be established.

SECTION 3 - DESCRIPTION OF SERVICE (cont'd)

3.2.8.6 Cancel Call Waiting (CCW)

Allows a customer to dial an activation code prior to making a call, and cancel the Call Waiting (CW) feature. CCW must be activated each time the customer wants CW canceled. Exception: Customers subscribing to a Custom Calling Service that provides "flash privileges" such as Three-Way Calling, can activate the CCW feature while an incoming or outgoing call is in progress.

3.2.8.7 Priority Ringing

Priority Ringing differentiates incoming calls from up to ten Customer pre-selected telephone numbers by signaling the customer with a distinctive ringing pattern. If the Customer subscribes to Call Waiting, a distinctive tone is heard for the selected set of numbers. The last incoming call can automatically be added to the list of pre-selected numbers.

3.2.8.9 Remote Call Forwarding

Remote Call Forwarding Service is an arrangement which includes the furnishing of a network address (seven or area code + seven digit telephone number) to an applicant or Customer, which permits call completion to another network address. The Remote Call Forwarding network address must be located in an exchange area.

3.2.8.10 Repeat Dialing

Repeat Dialing permits the Customer to have calls automatically redialed when the first attempt reaches a busy number. The line is checked every 45 seconds for up to 30 minutes and alerts the customer with a distinctive ringing pattern when the busy number and the customer's line are free. The Customer can continue to make and receive calls while the feature is activated.

3.2.8.11 Speed Calling

Speed Calling permits the customer to place calls to other telephone numbers by dialing a one or two digit code rather than the complete telephone number. The feature is available as an eight-code list or thirty-code list. Either code list may include local and/or toll telephone numbers. To establish or change a telephone number in a code list, the Customer dials an activating code, receives a second dial tone and dials either a one or two digit code (for the eight code and thirty code lists, respectively) plus the telephone number.

SECTION 3 - DESCRIPTION OF SERVICE (cont'd)

3.2.8.12 Three-Way Calling

Three-Way Calling permits the Customer to add a third party to an established connection. When the third party answers, a two-way conversation can be held before adding the original party for a three-way conference. The Customer initiating the conference controls the call and may disconnect the third party to reestablish the original connection or establish a connection to a different third party. The feature may be used on both outgoing and incoming calls.

TARIFF FORMAT

- A. Page Numbering** - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new pages are occasionally added to the tariff. When a new page is added between pages already in effect, a decimal is added.

- B. Page Revision Numbers** - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the Commission. For example, the 4th revised Page 14 cancels the Original Page 14. Because of the various suspension periods and deferrals the Commission follows in its tariff approval process, the most current page number on file with the Commission is not always the tariff page in effect. Consult the check sheet for the page currently in effect.

- C. Paragraph Numbering Sequence** - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
 - 2
 - 2.1
 - 2.1.1
 - 2.1.1.A
 - 2.1.1.A.1
 - 2.1.1.A.1.(a)
 - 2.1.1.A.1.(a).I
 - 2.1.1.A.1.(a).I.(i)
 - 2.1.1.A.1.(a).I.(i).(1)

- D. Check Sheets** - When a tariff filing is made with the Commission an updated check sheet accompanies the filing. The check sheet lists the pages contained in the tariff, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There shall be no other symbols used on this page if these are the only changes made to it. The tariff user should refer to the latest check sheet to find out if a particular page is the most current on file with the Commission.

SECTION 3 – DESCRIPTION OF SERVICE (CONT'D)**3.2 Resale Service Offerings**

Applicable rate schedules for the following services are provided in Section 4. Dedicated Access Lines may be required to connect Customer to Company's POP. Such dedicated Access Lines, when required, shall be the sole responsibility of Customer. Notwithstanding such responsibility, Company shall, upon Customer's request, order such dedicated Access Lines on behalf of Customer or its End Users, and shall invoice Customer for all related recurring and non-recurring charges. Intrastate rate plans are tied to specific interstate and international rate plans.

3.2.1 CommPartners "Switched One Plus Service" offers Reseller Customers interexchange Services via Feature Group D Access Lines for seamless origination, transmission and termination of communications. Feature Group D access is provided by the Local Exchange Carrier and allows the Customer to use its own Carrier Identification Code to route traffic to the Company's POP while the Customer's End Users will recognize the Customer as the End User's presubscribed interexchange carrier. The intrastate rates that CommPartners charges Reseller Customers for Switched One Plus Service are set forth in the Service Agreement between the Company and the Reseller Customer and in Section 4.2.1 of this tariff.

3.2.2 CommPartners "Dedicated One Plus Service" offers Reseller Customers interexchange Services via dedicated Access Lines for seamless origination, transmission and termination of communications. Dedicated access to the Company's POP may be provided by the Customer, Company or a Local Access Provider. The intrastate rates that CommPartners charges Reseller Customers for Dedicated One Plus Service are set forth in the Service Agreement between the Company and the Reseller Customer and in Section 4.2.2. of this tariff.

3.2.3 CommPartners “Toll Free Service” offers Reseller Customers a toll free number (e.g., 800, 888 or 877) and allows callers to reach the subscriber without toll charges. The subscriber pays for all incoming calls made on its assigned toll free number. Toll Free Service consists of a basic service (assignment of a toll free telephone number and a toll free calling area selected by the Customer) and additional features that Customers can select.

3.2.3.A Switched Toll Free Service is an inbound long distance service. This service terminates calls over the local telephone lines of Customer or its End Users, and calls are toll-free to the calling party. The rates that CommPartners charges Reseller Customers for Switched Toll Free Service are set forth in the Service Agreement between the Company and the Reseller Customer and in Section 4.2.3 of this tariff.

3.2.3.B Dedicated Toll Free Service is an inbound long distance service. SECTION 3 – DESCRIPTION OF SERVICE (CONT'D)**3.2 Resale Service Offerings (Cont'd)**

3.2.4 “Directory Assistance Service” offers Reseller Customers the ability to provide their End Users with phone numbers, addresses and NPA/Country codes and automatic call completion. A per-call surcharge is assessed against the Customer for each call made by the Customer’s presubscribed End-Users. This surcharge applies whether or not the Directory Assistance operator furnishes the requested telephone number(s), e.g., the requested number is unlisted, non-published or no record can be found. Requests for information other than telephone numbers will be charged for as requests for telephone numbers.

Directory Assistance Service gives the option of completing a call to the called station telephone number received from the Directory Assistance operator without hanging up and originating a new call. A usage rate for call completion applies in addition to the Directory Assistance per-call surcharge if the caller accepts the offer. The call completion charge will not apply if the call cannot be completed. The per-call surcharge and usage rates that CommPartners charges its Reseller Customers for Directory Assistance Service are set forth in the Service Agreement between the Company and the Reseller Customer and in Section 4.2.8 of this tariff.

SECTION 3 – DESCRIPTION OF SERVICE (CONT'D)**3.2 Resale Service Offerings (Cont'd)**

3.2.5 CommPartners “Calling Card Service” offers Reseller Customers the ability to allow its End Users to originate long distance calls from locations other than their primary service location through the use of a toll free network access number and an Authorization Code. CommPartners Calling Card Service provides an access number and authorization code issued by CommPartners which the Reseller Customer will incorporate into its End User’s calling card. CommPartners Calling Card Service allows Customer’s End Users who are away from their home or business, or who wish to have Calling Card Service only, access to CommPartners Network to place calls from any location in the State. Access to CommPartners Network for Calling Card Service is gained by dialing an access number. End Users may bill calls to their Calling Card account when calling from any location within the State. Applicable usage rates for Operator Service will apply when Calling Card Service is used. The rates that CommPartners charges Reseller Customers for Calling Card Service are set forth in the Service Agreement between the Company and the Reseller Customer and in Section 4.2.5 of this tariff.

3.2.6 “Prepaid Calling Card Service” offers Reseller Customers the ability to allow its End Users to originate long distance calls on a prepaid basis via a toll free network access number and an Authorization Code. Customer shall be given notice two (2) minutes before the available account balance is depleted, based upon the applicable rates for the call in progress. When the available balance is depleted, the call shall be terminated. A prepaid calling account shall expire on the date specified on the card, unless replenished by a charge to a commercial credit card as authorized by the Customer beforehand. The End-User will use the access number on the Prepaid Calling Card to access CommPartners Network. The applicable usage rate will be deducted on a real-time basis as the card is used until the full amount of the card is exhausted. Applicable usage rates for Operator Service will apply when Prepaid Calling Card Service is used. The rates that CommPartners charges Reseller Customers for Prepaid Calling Card Service are set forth in the Service Agreement between the Company and the Reseller Customer and in Section 4.2.6 of this tariff.

The rates that CommPartners charges Reseller Customers for Operator Assistance Service are set forth in the Service Agreement and in Section 5.2.7 of this tariff.

3.3 End User Services**3.3.1 Casual Calling**

Casual Calling Service permits End User Customers to obtain Service without the necessity of presubscription of their local lines. Customers utilizing Casual Calling Service shall access Service by dialing an access code in the form of 101XXXX, where “X” is the 4 digit Carrier Identification Code (CIC) assigned to the Company. The terms of such an ICB arrangement may be based partially or completely on a Term or volume commitment, type of originating or terminating access, mixture of services or other distinguishing features. RESPONSE TO QUESTION A-14-15
PERFORMANCE BOND ISSUE

Questions A14-A15

Due to Applicant's strong balance sheet and access to capital, along with its deposit policies, Applicant does not think it would serve the public interest to require a performance bond. Applicant's financial statements are enclosed as Attachment E. The balance sheet shows that Applicant currently maintains over \$2.5 million in current assets, including \$1.74 million in cash. Applicant received this capital from its Series A financing provided by Circle F Venture Partners and the Gallagher Corporation. Applicant will be seeking Series B financing during the third or fourth quarter to expand its network as well. As a general practice, Applicant does not require deposits from its customers, see sheet 8 of the local tariff and sheet 25 of the intraexchange tariff). Applicant, therefore, will not be holding significant amounts of its customers' money. It is also worth noting that Applicant's customers will also be corporations, rather than individuals. Applicant will not be engaging in any substantial construction, as it will only be using pre-existing buildings to locate its equipment, including incumbent carrier central offices and "carrier hotels." Although the performance bond requirement may serve a very valid purpose for applicants such as pre-paid service providers, in this situation, Applicant submits that a performance bond is unnecessary. If the Commission disagrees and desires Applicant to provide a performance bond, Applicant will comply.

RESPONSE TO QUESTION B-4
REVENUE AND OPERATING EXPENSES

Question B-4

The Applicant must provide the following information.

1. Provide the projected total revenue expected to be generated by the provision of telecommunications services to Arizona customers for the first twelve months following certification, adjusted to reflect the maximum rates for which the Applicant requested approval. Adjusted revenues may be calculated as the number of units sold times the maximum charge per unit.

Answer: In the first year, Applicant expects it will receive approximately \$25,000 in revenue from the provision of telecommunications services to Arizona consumers.

2. Provide the operating expenses expected to be incurred during the first twelve months of providing telecommunications services to Arizona customers following certification.

Answer: In the first year, Applicant expects to incur operating expenses of approximately \$20,000.

3. Provide the net book value (original cost less accumulated depreciation) of all Arizona jurisdictional assets expected to be used in the provision of telecommunications service to Arizona customers at the end of the first twelve months of operation. Assets are not limited to plant and equipment. Items such as office equipment and office supplies should be included in this list.

Answer: In the first year, Applicant expects to have no Arizona jurisdictional assets. As Applicant's business expands, Applicant may open a sales and support office and possibly locate network facilities in Arizona. But for the first year of operations, the total value of Arizona jurisdictional assets would be zero.

4. If the projected value of all assets is zero, please specifically state this in your response.

Answer: For the first year of operations, the total value of Arizona jurisdictional assets will be zero.
