DOCKETED BY [Signature]

January 31, 2005

Jeff Hatch-Miller
Chairman
Arizona Corporation Commission
1200 West Washington
Phoenix, AZ 85007-2996

Dear Chairman Hatch-Miller:

Attached is a Band-Aid. It represents the "fixes" that have been attempted over the years to the Pine-Strawberry water system. You will note that a Band-Aid merely covers up a problem and actually provides no prevention or remedy to the problem. The problem may continue to ache and fester without proper attention.

Moratorium: The implementation of a meter moratorium will not solve our problem. It has been tried and failed in the past. In spite of perception, in the past year, only 13 homes have been built in the Pine water franchise owned by Brooke Utilities. This is hardly, a runaway growth rate. Enclosed are documents from Gila County that substantiate this number. The moratorium imposed in the past created an artificial waiting list for meters, somewhere in the neighborhood of 200 to 300 people on the waiting list. It depressed local businesses and deflated the real estate investments of many people. It did not create one more drop of water. It merely put a Band Aid on the underlying problem. I would urge you not to put us through the tumultuous times of the past and put citizens property values in jeopardy. The reality is there is not a problem with new builds; the greatest potential for increased water use lies in the number of second homes that will be converted to primary residences in the next decade.

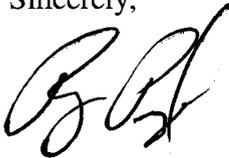

Underlying Problem: We all know the underlying problem is a lack of supply and storage. I have been personally involved with this situation since the days of Jennings, Kunasek, and Irvin. Nothing has changed since 1996 except...

1. One commissioner, in a private conversation, finally admitted that the Corporation Commission, most likely, cannot solve the problem, unless the commission is granted broader authority to force infrastructure improvements and exploration for water resources. This conclusion is not surprising after nine years of observing no change in the condition in Pine.

2. From a business model standpoint, it is not in the best interest of Brooke Utilities to solve the problem. If I understand the structure of revenue return for a utility company regulated by the Corporation Commission, there is substantial risk and no incentive to make the necessary improvements.
3. As a result of our frustration, Robert Randall and I have personally employed a hydro-geologist to work with us to find new water resources, and we believe we have been successful. Our study has been validated by a 1974 study of the same area that had not been made public. We would be happy to discuss our findings with you on an informal basis. There is an economical solution to the problem. We are prepared to risk our capital to provide an end to this ongoing problem, however, again, under the present structure, there is no model or means to compensate us for our risk and investment. Truly, the reason we are doing this is because we are citizens of Pine and we are just as tired of this problem as you commissioners must be.

To summarize, please do not put us back in the position that the moratorium placed us in several years ago. It did not solve anything. Let's work together in a non-regressive way to solve this situation. The problems cannot be fixed with Band Aids; it is time for major surgery.

Sincerely,

Ray Pugel
Broker/Owner
