COMMENTS OF INDUSTRIAL SOLAR TECHNOLOGY CORPORATION
REGARDING STAFF REPORT ON PROPOSED CHANGES TO THE ENVIRONMENTAL
PORTFOLIO STANDARD RULES (DOCKET NOS. RE-00000C-00-0377 AND RE-00000C-05-0030)

Industrial Solar Technology Corporation supports the comment made by SOLID USA, namely that the distributed energy category be divided between technologies already established in the marketplace and the other technologies which would be included in this category.

Industrial Solar Technology Corporation also suggests that the category "solar water heating that displaces fossil fuels" be specifically stated to include other solar thermal processes that displace fossil fuels, such as steam generation and industrial process heating whereby solar thermal energy could be used for heating air for drying and baking, the cooking of food products, etc.

Thank you for the opportunity to submit these comments.

Sincerely,

E. Kenneth May
President
Industrial Solar Technology Corporation
