Nature of Complaint:

Customer wrote the following to the Commission on a public comment form received 3/29/05 -

Any rate increases of a public utility should be in step with wage increases of the population it serves. The majority of citizens here have not seen 10.4% wage increases in the past year. Such an increase generally takes several years and is frequently offset by increases in other deductions, such as health care.

In my opinion 10.4% is an unreasonably high rate increase, and would set a precedent that would result in other utilities seeking similar action.
