 E-01773A-04-0528

Dear Sirs:

I am concerned about the proposed 15.44% rate increase AEPCO has asked for over the next 3 years, especially the 12.44% increase in 2005. These double digit increases are reminiscent of the 1970's with one exception. Real wages were going up as fast as prices; today employees are lucky to get a 3% wage increase every other year. As a small business owner, I have not had a pay increase in a number of years. And my customers would not stand for a 12% increase this year or any year. Don't let regulated companies get away with something market driven companies cannot get away with. As commissioners, protect the people who elected you and not the companies you are regulating.

Sincerely,

*[Signature: Diane McDaniel]*
