Jeff,

This looks great. While reviewing this, Staff has come up with a couple more questions for you.

1. What what type of service is Global Crossing Local Service, Inc. providing to its customers (resold or facilities-based local exchange).

Answer: Global Crossing Local Services provides facilities-based local exchange service; Global Crossing Telemanagement provides resold local exchange service; Global Crossing Telecommunications provides resold long distance service .

2. What type of service does Matrix plan to offer the formaer customers of Global Crossing Local service, Inc.?

Answer: Upon consummation of the transaction, Matrix will continue to provide all services to Small Business Group customers on a resale basis. There will be no change to the services received by the Small Business Group customers as a result of the transaction, and Matrix will use Global Crossing as its underlying carrier to the extent that Global Crossing provides facilities-based services.

3. If there are any differences in the service formally offered and the service the customer will receive, how will those differences effect the customer?

Answer: Not applicable.
