RE: *APS Power Supply Adjustor*
Docket No. E-01345A-05-0816

Dear Commissioner Gleason:

I apologize for the delay in responding to your letter of November 23, 2005. APS was in the process of finalizing the requested information when it was determined by Commission Staff that APS should update the test period used in its November 4, 2005, rate filing. That rate filing had used fuel and purchased power projections consistent with those in the PSA surcharge and Plan of Administration proceedings. Now that it has been determined that APS should use more up to date information in the rate filing, we believe and have so informed your office that our response to your letter should likewise use this more recent fuel and purchased power information.

We will be submitting that information on a confidential basis to your Staff by the end of this week. Because APS does not yet have a confidentiality agreement with the Commission for the pending rate case, we will provide the response in the above PSA surcharge and Plan of Administration Dockets. Once a protective agreement is in place in Docket No. E-01345A-05-0816, APS will provide Staff the same response in such rate case Docket.

Sincerely,

Steven M. Wheeler
