1 Application of Tariff

This tariff sets forth the service offerings, rules, regulations, charges and rates for the provision of non-facilities based resale of intrastate interexchange telecommunications services by Vista Voice & Data, Inc. between locations within the State of Arizona.

Issued: March 1, 2001

Issued By: Charles J. Davis, President/C.E.O.

Effective: April 1, 2001

2 Explanation of Symbols

The following symbols are used for their indicated purpose and will appear in the margin when used.

- (C) To signify changed listing, rule, or condition, which may affect rates or charges.
- (D) To signify discontinued material, including listing, rate, rule, or condition.
- (I) To signify an increase.
- (M) To signify material relocated from or to another part of tariff schedule with no change in text, rate, rule or condition.
- (N) To signify new material including listing, rates, rule or condition.
- (R) To signify reduction.
- (S) To signify reissued material.
- (T) To signify change in wording of text but not change in rate, rule or condition.

3 Tariff Format

When a tariff filing is made with the Commission, an updated check sheet accompanies the tariff filing. The check sheet lists the sheets contained in the tariff, with a cross-reference to the current revision number. When new sheets are added, the check sheet is changed to reflect the revision. An asterisk (*) designates all revisions made in a given filing. There will be no other symbols used on this sheet if this is the only kind of change made to it (i.e., the format, etc. remains the same, just revised revision levels on some sheets). The tariff user should refer to the latest check sheet to determine if a particular sheet is the most current on file with the Commission.

3.1 Sheet Numbering

Sheet numbers appear in the upper right corner of each sheet. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 5 and 6 would be sheet 5.1.

3.2 Sheet Revision Numbers

Revision numbers appear in the upper right corner of each sheet. These numbers are used to determine the most current sheet revision on file with the Commission. For example, the 2nd revised sheet 5 cancels the 1st revised sheet 5. Because of various suspension period, deferrals, etc., the Commission follows in their tariff approval process, the most current sheet number on file with the Commission is not always the tariff sheet in effect. Consult the Check Sheet for the sheets currently in effect.

3.3 Paragraph Numbering Sequence

There are multiple levels of paragraph coding. Each level of coding is subservient to its next higher level. For example:

- 3.
- 3.1
- 3.1.1
- 3.1.1.1.

4 Explanation of Abbreviation

- LATA** Local Access and Transport Area. A geographic area established by the US District Court for the District of Columbia in Civil Action No. 17-49, within which a Local Exchange Company provides communications services.
- LEC** Local Exchange Company.
- PIC** Presubscribed Interexchange Carrier
