ARIZONA CORPORATION COMMISSION  
3/27/06  
DOCKET #T-01945B-05-0640

BOX 145  
Yucca, Az. 86438

4700

ORIGINAL

To all Parties;

I do not agree with the decision because we never discussed the same things. The only thing they had to talk about was rules and regulations which were not challenged in the first place. My only complaint was the written price quote I had in my hand and the difference in the way they quote prices to each customer. My purchase of the property was contingent to expenses to finish setting up a home. I think Frontier should either keep their agreement or buy me out so I can locate somewhere else.

The Docket control form I received had a fact finding, number 22 on page #6 that I found shocking. It said that no evidence was given to support my claim of unfair, unjust or discriminating treatment. I thought Mr. Pebley did a very good job of that. He made a slur against me because one of my neighbors on the next road had a pick up and a camper in his back yard. He also has a phone and I assume he pays his bill or the phone co. would cut him off so if he has an old pick up in his back yard it is none of the phone co's business. Mr. Pebley also said that they quoted Joyce Covey a price that amounted to \$1.69 a foot because she owns 40 acres and might have some good neighbors move in. In my book that is discrimination. He also said that they didn't bury lines any more because they have to go to deep and it is too expensive. Since we were before the judge Joyce Covey's phone has been put in and they put part of it on poles and buried about 1000 ft.

It seems odd to me that the corporation commission would allow a utility to operate without a set rate for all customers. Mr. Pebley is running the company on likes and dislikes. He is awed by the 40 acre owners which he said on the stand in front of the judge. Why is the telephone co keeping an employee that allows personal feeling to get in front of the company? If I check my calculator and divide 640 acres by 40, I get 16. If I divide 640 acres by 2.5 I get 256. It seems to me that the 2.5 acre parcels would give the phone co. more business than the 40 acre parcels. Mr. Pebley also said they couldn't run the line on the poles from Glynn Ross's house to mine because of easements. Public utility easements can be used by either. (PUE) Some neighbors paid \$60.00, one paid \$160.00 and the rest were free.

I would like to request a copy of the transcript because I guess I will turn it over to a lawyer. When I came down to Phoenix I didn't count on facing an attorney but he didn't have a case because he only went over items that were not challenged. I will be at the open meeting on April 4 and 5 th.
