Arthur I. Grossman Mendell:  
I wish to protest the delays in the resolution of the C.A.P. project. Sun City Taxpayers Ass. was organized, as they proclaim, to keep my money in my pocket. It was not organized to look to the future and solve our problems with intelligent thought. Their idea that putting water in the Agua Fria Basin will benefit Sun City as well as putting C.A.P. water on the golf courses does not take into account that:

1. Water travels underground at 2 feet per year and in whatever direction it meets the least resistance.
2. The aquifer is not one big lake but many sub-basins divided by faults.
3. Turning off the golf course pumps by 6,561 acre ft./yr. guarantees that amount of water will be left in the aquifer where we need it.

Arizona Corporation Commission  
DOCKETED

JUL 16 2002

DOCKETED BY

4. These delays are causing subsidence due to the compaction of the soil and compacted soil can never accept water.

5. Your own hearing officer recommended the golf course solution years ago.

They think only of the money. I too think of money. I think of my property's value which is sinking with the soil, as they cause delay after delay.

S.C.J.A. claims a large membership but many of us have left because of this dispute. Their political influence is not what they would have you believe. Their enemies are many.

yours truly,

Arthur J. Grossman
