**Subject:** CAP Water

W-01656A-98-0577  
WS-02334A-98-0577

To the Arizona Corporation Committee:

I strongly support the proposed plan to use CAP water for golf course irrigation in the Sun Cities with the installation of the necessary pipeline connections. I deeply resent the delaying tactics of the Sun City Taxpayers Group in its opposition to a project which has been thoroughly researched and approved by experts. I urge your prompt action in approving this plan.

Sincerely,

F. Burton Sellers  
12637 Rampart Drive

W-01656A-98-0577

WS-02334A-98-0577

We wholeheartedly support the Groundwater Savings Project. Although we don't know the expense and availability of a CAP Pipeline, this must be done in order to use this water for golf course irrigation.

It is surprising to us that the state legislature does not make this mandatory for all water users in the state and/or put a moratorium on building in order to conserve our groundwater supply.

**Subject:** Use of CAP water for golf courses

W-01656A-98-0577  
WS-02334A-98-0577

Dear Sirs:

After hearing the various sides of the CAP water issue, I would like to encourage you to vote in favor of using CAP water for the irrigation of golf courses in the Sun Cities area.

If we continue to use water faster than it can be naturally recharged, we will create an irreversible collapse of ground on which our houses are built. Evidence of this has already been seen in the Youngtown area. A "yes" vote will help to maintain our current ground water level for future generations. A "no" vote will not only lead to a loss of ground water, but will lead to costly house, building and street repairs and a loss in property values as well.

It is true that there will be an initial cost to bring CAP water into our area. However, it would seem prudent to make that investment now rather than mortgaging our future with years of costly repairs to our homes and communities. This issue brings to mind the old adage "You can pay now or you can pay later, but it always costs more to pay later."

Thank you for your serious consideration of this important issue.

Sincerely,  
Clifton J. Robinson  
Sun City West

I have a home at 15405 Sky Hawk Dr. in Sun City West. I fear that the use of CAP water is becoming a political issue. It should not be that as common sense would tell you that the less water we draw out of the ground the longer it will last. I realize that use of the CAP water is more expensive (Although I find that hard to understand), but it will assure all of us of a continued availability of good well water.

Thank you for supporting the use of CAP water on the Sun Cities golf courses.

**Subject:** Groundwater and Subsidence

W- 01656A-98-0577  
WS- 02334A-98-0577

To Whom it may concern,

I'm not a Hydrologist or Geologist, but I know enough about pumping more water from the aquifer than what percolates back to replace it will cause the ground to sink over time, especially in flat terrain such as our area of desert. I also know that water does not move horizontally once percolation begins until it reaches the water table, then it's weight raises the water table around it, which could be some distance away, depending on how the layers rock, sand, clay etc. in the aquifer, which affects how the weight of the water in one area will raise the water level in another area, but most generally, the effect is in the same area where surface water percolates downward. Therefore, it is extremely important that we replace our ground water with CAP surface water in the area it is being pumped from so the ground does not sink and damage out homes and property. I am, Respectfully;

W- 01656A-98-0577  
WS 02334A-98-0577

Clear DayTo: Arizona Corporation Commission, attention of Commissioner William Mundell

Dear ACC folks,

We wish to add our support to the CAP task force plan for direct use of CAP water to the Sun Cities' golf courses as a groundwater savings plan.

We are increasingly concerned that the continuing delay tactics are not only going to increase costs for completing the project, but that our underground water level is declining at alarming rates, especially during this period of drought. In addition, the recent incidents of property damage caused by subsidence make it painfully clear that the CAP plan must be approved and implemented without further delay.

Sincerely,

M/M James Moehnke

**To:** ACC.UTIL(mailmaster)  
**Date:** 7/30/02 12:32PM  
**Subject:** Sun Cities Ground Water Savings Plan

I write as a ten year residence of Sun City West to express my view and that of all of my immediate neighbors in support of the use of our CAP Water Allocation to replenish ground water levels and to accomplish this by a pipeline construction that would deliver this water to all golf courses in this area.

This method of replenishing ground water in our area aquafers is the most efficient and effective way as compared to recharge into areas that may or may not add to the water table levels of our area.

Unfortunately there seems to be a great deal of misinformation emanating from small groups that are opposed to the expenditure of funds for pipe line construction and are motivated by their water usage cost being held to an absolute minimum without regard for the importance of slowing aquafer depletion.

We hope the Commission will recognize that the "Squeaky Wheel" efforts to prevent pipe line approval are by minority groups and that the great majority of thoughtful residents of the Sun Cities area support the intelligent solution of using CAP water via pipeline to recharge water tables.

Thank you for your thoughtful consideration of this position !

W- 01656A-98-0577  
WS- 02334A-98-0577

Commissioners,

I am in favor of the Cap Water proposal for the golf courses in Sun City West. It cannot do anything but help groundwater replenishment and help stave off subsidence.

As a relatively young retiree at 62 years of age, I have at least 20 more years hopefully to live and would hope to be able to sell my house at that time. This will not be possible if we don't do something to preserve our water supplies.

The opposition in this matter is made up of people who are older and have nothing to lose by opposing anything that will cost a little more money because they hope to put off any cost until after they die. This solves nothing for the rest of us.

We are definately in favor of using CAP water for golf courses rather than lowering our groundwater level by pumping it for this purpose.

**Subject:** Re: CAP Water

We want to support the Arizona Corporation Commission in the use of CAP water. We are winter residents of SCW and believe that we indeed have been water hogs and hopefully we can change this.

**Subject:** Groundwater Savings Project

W-01656A-98-0577  
WS-02334A-98-0577

This is in support of the Groundwater Savings Project through which Central Arizona Project water would be used to replenish groundwater in the Sun Cities area by using CAP water to irrigate the golf courses. My wife and I are members of PORA and are residents of Sun City West for the past 16 years.

Prior to my retirement I was with the Arizona Department of Education and my responsibilities included travel throughout the state providing services to school districts and community colleges. I witnessed, particularly in Cochise County, the major degree of subsidence (measured in feet) due to groundwater depletion. I see the same thing beginning to happen in this part of Maricopa County. It is vital that the Groundwater Savings Project be approved to minimize property damage here, let alone to provide a reliable source of water to our residents.

Please approve this project!

William J. Anderson, 19303 New Tradition Road, Apt. 355, Sun City West, AZ

To Whom It May Concern:

I am making an urgent plea for you to support the Groundwater Savings Project which proposes to use CAP water for golf course irrigation. One could write a book about it but I am sure you will be doing your homework to make an informed decision on this matter.

Thank you for your time and consideration. Do not forget the future generations.

Sincerely,

Marion E. Bradley
