Gentlemen,

I am a very concerned citizen of Sun City West. I am concerned about subsidence and about the proper use of our very valuable water. My wife and I want you to know that we strongly support the Groundwater Savings Project which proposes to use CAP water for golf course irrigation.

This issue has gone on long enough. It is time to reject the Sun City Tax Payers approach to this problem and approve CAP water for golf course irrigation. It is our strong view that the Sun City Tax Payers Association view is not sound or justified by the facts. Please--lets get this matter behind us and start properly using CAP water. Now is the time to act and reject the delay tactics of the SC Tax Payers Association. To continue delaying approval is harmful and damaging to the citizens of the Sun Cities.

Thank you for your attention to this matter.

Sincerely,

Robert M and Bebe Jean Montgomery

Dear Friends,

I want to show my support for the Groundwater Savings Project in the Sun City West area.

I think it is absolutely the most important activity going on in the West Valley, and request your vote to put it into action.

Yours truly,

James R. Harns

**Subject:** Support for Sun Cities Groundwater Savings  
Dear Sirs,

Please add my name to the list of people who support the Sun Cities Groundwater Savings Project (GSP).

Please inform the Arizona Corporation Commission (ACC) of my support for this project.

I am well aware of the need for ground water conservation-- since I lived in the San Jose, California area for about 25 years (1971-1997). There was substantial subsidence in the Alviso area (northern San Jose). The ground level has sunk so far in the past years, that this area, which was above sea level, is now well below sea level and must be protected by a series of dikes to avoid flooding from the San Francisco Bay. Due to this subsidence, many areas of northern San Jose experience building cracking, and flooding during stormy periods. All of this information is available from public records--- should you want to investigate further.

Also, it is my understanding that the piping system is already in place in Sun City West, but that the issue with "some people" is that they are against installing pipes in Sun City? Is it possible that the Sun City West portion can be completed immediately; then the Sun City addition can be made when an agreement with them is finally made?

Per the GSP plan, it makes much more sense to me to distribute the water on the Sun Cities Golf Courses (where it is needed), than to do it many miles up river-- where we might not get the benefit. I totally support the project.

Lawrence F. Brokish

Arizona Corporation Commission

Dear Sirs,

As residents and property owners in Sun City West, we strongly urge you to support the Groundwater Savings Project, using our allocation of CAP water for golf course irrigation rather than recharging the groundwater at a distance in the Aquia Fria project. We are alarmed at the drop in the water table level in our area, with the added prospect of ground subsidence, which can only get worse with the aggressive construction going on in the area. This is an urgent and vital matter for us.

Sincerely,  
Jennifer and David Eaton
